but what if we are all fictioneers what if we all continually make up the stories of our lives our life stories are ours to construct as we wish within or even against the constraints imposed by the real world j m coetzee a writer in her late thirties retreats to landes in france for a while fleeing from her own suffering after the break up of a relationship little by little she finds solace in writing about the losses in her life about her person and about indifference and freedom and in sharing the doubts that arise in her creative process with a you whom she imagines to be on the other side of the paper the glass eye a self referential element of the authorprotagonist and metaphor for pain and transcendence also represents the literary concept of the work a private notebook where fiction imitates and replaces a fragmented reality

Sight Unseen

the new york times bestselling author of witnessed intruders and missing time three groundbreaking books on the ufo phenomenon returns with astonishing evidence that other worldly beings are a very real and growing part of our lives in sight unseen budd hopkins and coauthor carol rainey show how fascinating discoveries in modern science support the plausibility of the ufo phenomenon featuring sixteen never before published cases sight unseen probes two newly uncovered patterns in alien abduction cases of ufo invisibility and reports of genetically altered alien beings who interact with humans during their routine lives the invisibility accounts detailed by hopkins include numerous daylight abductions in densely populated urban areas all apparently unseen and accomplished through a technology of invisibility two air force non coms are snatched from the tarmac of a busy military airfield an australian family is levitated up into a hovering craft while the father remains paralyzed on the ground with a camera to his eye the resulting evidence on film is discussed in terms of our own scientific advances in the second series of cases abductees report encounters with beings who appear human but apparently possess paranormal powers and stunted emotional ranges three young women unknown to each other are mysteriously summoned to job interviews in ordinary office settings they encounter human looking beings who lead them into baffling ufo abduction experiences a wisconsin farmer meets damoe a man with odd behavior who closely resembles his son damoe eventually reveals himself as an accomplice of ufo occupants in a startling abduction of the farmer and his wife five year old jen is abducted at night to a nearby playground there she must teach the techniques and skills of play to twelve seemingly identical quasi human children along with these bizarre first person stories told by credible people hopkins and rainey explore cutting edge advances in our own technologies and scientific theories that show how these new ufo patterns could have a concrete basis in contemporary science included are an examination of cloaking devices for aircraft mind

control technologies and teleportation achieved in the lab perhaps the most compelling argument to support these cases lies in the startling and controversial new science of transgenics that actually allows for the creation of alien human beings

articles appear frequently about individuals whose age is noted as a feature of their activism but the activism of seniors as a growing and influential part of the population is often otherwise overlooked the speed of change the expansion of the senior demographic the growth of citizen participation and the constant visual images reminding us of these factors tell us that it is time to look to seniors who are putting their time and energies into helping others and helping the world whatever one's political view there is consensus in recognizing that we are living in a time of tremendous change when traditionally trusted institutions and cultural mores are questioned and seriously challenged it is a time when more and more individuals feel a need to do something something about issues that concern them something that makes

them aware of the need for a sense of control in a world in chaos something that makes them aware of their own strength power and the value of the wisdom that comes with age in a time when social media make shallow clicktivists of so many the people profiled here are true activists their dedication crosses all societal lines ethnic political religious and socio economic some have always considered themselves activists some find that this stage of life brings a new perspective that results in the need to do more than say they tell us in their own words the what why and meaning of their specific activism and show others how to do it their stories are inspiring for people of all ages
