in a former work i have given some details of the training of an alpine guide so i will not repeat them here the mountain guides of switzerland form a class unlike any other yet in the high standard of honour and devotion they display towards those in their charge one is reminded of two bodies of men especially deserving of respect and confidence namely the civil guards of spain and the royal irish constabulary like these the alpine guide oftentimes risks his health strength even his life for persons who are sometimes in themselves the cause of the peril encountered like these mere bodily strength and the best will in the world need to be associated with intelligence and foresight like these also keen fully developed powers of observation are essential a certain climber of early days has wittily related in the alpine journal a little anecdote which bears on this point some years ago writes the late mr f craufurd grove a member of this club was ascending a small and easy peak in company with a famous oberland guide part of their course lay over a snow field sinking gradually on one side sharply ended by a precipice on the other the two were walking along not far from the edge of this precipice when the englishman thinking that an easier path might be made by going still nearer the edge diverged a little from his companion s track to his considerable surprise the guide immediately caught hold of him and pulled him back with a great deal more vigour than ceremony well nigh throwing him down in the operation wrathful and not disinclined to return the compliment the englishman remonstrated the guide s only answer was to point to a small crack apparently like scores of other cracks in the neve which ran for some distance parallel to the edge of the precipice and about 15 feet from it

Alpine Guides Technical Manual 2017

the author has worked to answer all your questions about travel and recreation in a state so remote this guide attempts to target your interests and save you time money and effort so that nothing is wasted during your trip because alaska is so big and your options so varied the guide is organized so you can zero in on the activity or activities that appeal to you most thirteen chapters focus solely on adventure travel each devoted to a single activity the five regional chapters that follow focus primarily on the basics in a given area of the state getting around shopping lodging dining and entertainment once you ve chosen the adventure of your dreams you can go to the appropriate regional chapter to get the scoop on the best places in the vicinity to stay eat buy gear rent a car and learn about local culture and history outdoor travelers also are likely independent travelers a multitude of companies offer exciting sounding jaunts to scenic places all over the state but many of these outfits work only

with tour providers such as cruise ship operators to obtain large numbers of clients per trip thus excluding people who wish to travel on their own in this guide all our listings are available to independent travelers as well as those in tour groups the objective is not to provide the most information about destinations or attractions but rather the most useful information the guide is opinionated and for good reason any destination or outfitter listed here has made the cut by proving itself a wonderful place to visit or a reliable company with which to do business if for example you want to learn more about sea kayaking in alaska you will not be supplied with every operation in the business and believe us there are many of them competing for your dollars what you will get is a select assortment of those we consider best and why after all isn't the point of a guidebook to help you make the most informed choices
