beam leads the vast majority of chips are intended for connection with thermosonic bonds all other methods require some modification to the wafer as early as 1972 jordan described three gang bonding methods spider lead bonding flip chip bonding and beam lead bonding an insulation displacement contact idc also known as insulation piercing contact ipc is an electrical connector designed to be connected to the conductor s of an insulated cable by a connection process which forces a selectively sharpened blade or blades through the insulation bypassing the need to strip the conductors of insulation the conventional idcs consist of two fairly rigid contact beams and a wire slot between them the conductor slot is smaller than the conductor diameter when a wire is inserted into the idc slot the lead in chamfer cuts and displaces the wire insulation table of contents beam leads idc 1 navigating beam leads idc ebook formats epub pdf mobi and more beam leads idc compatibility with
