Addresses and Papers Delivered ... Annual Meeting 1961 papers on drilling and production practice selected by the program committee of the American Petroleum Institute's central committee on drilling and production practices from the papers delivered at national or district meetings of the division of production

Proceedings 1956 presents information on how and why Americans now use oil as the predominant energy source America's oil reserves and how much oil there is to meet America's needs energy efficiency and how to make wise energy choices and the environmental impact of oil use contents introduction are we running out of oil do markets lead to efficient energy choices is the environment getting cleaner should we switch to alternative fuels is global climate change a reason to phase out oil use conclusion charts and tables

Oil 1930 contributing authors include C. J. Coberly, C. E. Beecher, H. C. Fowler and many others
