Translating Nephesh in the Psalms into Chinese 2018-08-31 this interdisciplinary study tackles the controversy of translating nephesh 魂 魄 by using an intergenerational translation team to deepen our understanding of this term and providing a more valuable translation in chinese especially for use in specialist children s bibles traditionally nephesh is often translated in the bible as soul but despite the limitations of this popular rendering it has led christians in chinese contexts to falsely understand views regarding the nature of human beings as a trichotomy dr hui er yu s study offers different options for translating nephesh using the context of where the word appears in scripture as well as in reference to linguistic and cultural meanings in chinese contexts the findings in this book will help to remove anthropological misunderstandings among many chinese christians related to nephesh as a result of historic translation decisions dr yu takes a unique approach to translation by using an intergenerational

bible translation team ranging from seven to fifty one years of age which not only demonstrates the importance of intergenerational ministry but also presents a way to fulfill the growing need for well translated children s bibles in china for thousands of young believers this book provides important lessons for the many translation projects working towards children s bibles but also for how translation of biblical terms can be better reached through this intergenerational process

Research and Professional Practice in Specialised Translation 2020-09-18 specialised translation has received very little attention from academic researchers but in fact accounts for the bulk of professional translation on a global scale and is taught in a growing number of university level translation programmes this book aims to provide three things firstly it offers a description of what makes the approach to specialised translation distinctive from wider ranging approaches to translation studies adopted by translation scholars and applied linguists secondly unlike the traditional approach to specialised translation this book explores a perspective on specialised translation that is much less focused on terminology and more on the function and reception of specialised translated texts finally

the author outlines a professionally oriented hands on approach to the teaching of specialised translation resulting from many years of teaching it to ma students the book will be of interest to translation studies students and scholars as well as professional translators who are interested in the theory on which their activity is based

Lasers and Current Optical Techniques in Biology 2007-10-31 the introduction of innovative light sources fibre laser sources and light emitting diodes is opening unexpected perspectives into optical techniques and is promising new exciting applications in the field of biomedicine lasers and current optical techniques in biology aims to provide an overview of light sources together with an extensive and authoritative description of the optical techniques in bio medicine this book is designed to give biomedical researchers a strong feel for the capability of physical approaches promote new interdisciplinary interests and persuade more practitioners to take advantage of optical techniques current developments in a variety of optical techniques including near infra red spectroscopy and traditional and advanced fluorescence techniques are covered ranging from those that are becoming

common practice to those that need much more experimentation before they can be accepted as real breakthroughs further topics include optical coherence tomography and its variations polarised light imaging and principle laser and lamp sources a usually fragmentary topic often dispersed among specialist publications the wide range of topics covered make lasers and current optical techniques in biology of interest to a diverse range of scientific communities
