cities contested engages in this debate from the perspective of comparative urban history examining the struggles in and about urban space at a time when ideas about the city and concepts of urban planning were being reconsidered this book discusses the structural rupture of the time by comparing case studies of italian and western german cities analyzing central issues of urban politics urban renewal and heritage and urban protest and social movements an original contribution to current debates on the transition from industrial modernity to post fordist societies as well as to urban history and the history of social movements cities contested draws on the parallel histories of italy and germany to propose new questions and new avenues for investigation places are locations of value where psychological and cultural needs are satisfied human relationships with particular environments play a key role in motivating developing and nurturing the life of societies undifferentiated space becomes place as we understand it better and its built and natural forms become endowed with value however misunderstanding the critical importance of heritage locations particularly based on rejection of local and regional distinctiveness has often led to their destruction featuring essays from across central europe and beyond and aimed at practitioners decision makers and concerned citizens alike this book raises awareness about the responsibility that we bear for every action taken that modifies the formal and socio cultural context potentially these actions can negatively impact the cultural landscape learning to recognize the essential value of heritage to the place ness of our cities and landscapes is vital in helping us to preserve and enjoy within the church epilogue unfinished business the age of revolutions after the 1820s chronology bibliography index since late antiquity relics have provided a privileged spiritual bond between life and death between human beings and divinity royalty nobility and clergy all tried to obtain the most prestigious remains of sacred bodies since they granted influence and fame and allowed the cult around them to be used as a means of sacralization power and propaganda this volume traces the development of the veneration of relics in europe and how these objects were often catalysts for the establishment of major pilgrimage sites that are still in use today the book features an international panel of contributors taking a wide ranging look at relic worship across europe from late antiquity until the present day they begin with a focus on the role of relics in jacobean pilgrimage before looking at the link between relics and their shrines more generally the book then focuses in on two major issues in the study of relics the stealing of relics furta sacra and their modern day scientific

examination and authentication these topics demonstrate not only symbolic importance of relics but also their role as physical historical objects in material religious expression this is a fascinating collection featuring the latest scholarship on relics and pilgrimage across europe it will therefore be of great interest to academics working in pilgrimage religious history material religion and overstated rapid development and inappropriate conservation techniques are threatening many heritage unique sites in different parts of the world selected papers presented at the 17th international conference on studies repairs and maintenance of heritage architecture are included in this volume they address a series of topics related to the historical aspects and the reuse of heritage buildings as well as technical issues on the structural integrity of different types of buildings such as those constructed with materials as varied as iron and steel concrete masonry wood or earth restoration processes require the appropriate characterisation of those materials the modes of construction and the structural behaviour of the building this knowledge can be gained through a series of material characterisation techniques preferably via non destructive tests modern computer simulation can provide accurate results demonstrating the stress state of the building and possible failure mechanisms affecting its stability of particular importance are studies related to their dynamic and earthquake behaviour aiming to provide an assessment of the seismic vulnerability of heritage buildings contributions originate from scientists architects engineers and restoration experts from all over the world and deal with different aspects of heritage buildings including how to formulate regulatory policies to ensure effective ways of preserving the architectural heritage earthquake resistant engineering structures xiii papers presented at the 13th international conference on earthquake resistant engineering structures form this volume and cover basic and applied research in the various fields of earthquake engineering relevant to the design of structures major earthquakes and associated effects such as tsunamis continue to stress the need to carry out more research on those topics the problems will intensify as population pressure results in buildings in regions of high seismic vulnerability a better understanding of these phenomena is required to design earthquake resistant structures and to carry out risk assessments and vulnerability studies the problem of protecting the built environment in earthquake prone regions involves not only the optimal design and construction of new facilities but also the upgrading and rehabilitation of existing structures including heritage buildings the type of highly specialized retrofitting employed to protect the built heritage is an important area of research the included papers cover such topics as seismic hazard and tsunamis building performance during earthquakes structural vulnerability seismic isolation and energy dissipation passive earthquake protection systems what can fables and fairytales tell us of law its practices and ideals drawing on real and metaphorical literary and jurisprudential accounts and practices of law this volume reveals that law has recourse to fables and fairytales as moral exempla as a new form of law and literature found in diverse sources ranging from the fables of de la fontaine and fairytales of perrault and grimm to the modern fairytales of true blood and harry potter this 1995 book is a detailed study of sicilian life and economy in the transitional reign of frederick iii 1296 1337 this book presents emerging perspectives on disaster resilience and human settlements in the larger context of the anthropocene the chapters explore urban and rural perspectives focusing on the current and emerging perspectives on disaster resilience through a holistic approach involving scientists humanists planners policymakers and professionals in the global debate this edited collection examines the formation of urban networks and role of gateways in europe from
