douglas haig s popular image as an unimaginative butcher is unenviable and unmerited in fact he masterminded a british led victory over a continental opponent on a scale that has never been matched before or since contrary to myth haig was not a cavalry obsessed blinkered conservative as satirised in oh what a lovely war and blackadder goes forth fascinated by technology he pressed for the use of tanks enthusiastically embraced air power and encouraged the use of new techniques involving artillery and machine guns above all he presided over a change in infantry tactics from almost total reliance on the rifle towards all arms multi weapons techniques that formed the basis of british army tactics until the 1970s prior re evaluations of haig s achievements have

largely been limited to monographs and specialist writings walter reid has written the first biography of haig that takes into account modern military scholarship giving a more rounded picture of the private man than has previously been available what emerges is a picture of a comprehensible human being not necessarily particularly likeable but honourably ambitious able and intelligent and the man more than any other responsible for delivering victory in 1918
