occupational field 2800 electronics maintenance training and readiness manual navmc 3500 6a details the established individual training standards its for required events for standardization of training for marines assigned within the 2800 military occupational specialty mos it also provides tasking for formal schools preparing personnel for service in the marine corps this navmc supersedes navmc 3500 6 occupational field 2800 ground electronics maintenance training and readiness manual

Military Occupational Specialties Manual (MOS Manual).

2013-09-21

Seloc marine maintenance and repair manuals offer the most comprehensive authoritative information available for outboard inboard stern drive and diesel engines as well as personal watercraft. Seloc has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, instructor, and student, these manuals are based on actual teardowns done by Chilton Marine's editors/authors in our on-site facility, providing complete coverage on everything from basic maintenance to engine overhaul. Every manual features simple-to-follow, step-by-step illustrated procedures, hundreds of exploded drawings, photographs, and tables, troubleshooting sections, accurate specifications, and wiring diagrams recognized and used by technical trade schools as well as the U.S. military. Covers all 80-300 hp V4, V6, and V8 2-stroke models.

Marine Corps Integrated Maintenance Management System (MIMMS) Introduction Manual

1995

It is a pleasure to introduce to the reader this new marine painting manual. The previous edition, entitled Ship Painting Manual, was published in 1975. Since then, a number of new technological developments have taken place. Also, standards with regard to safety, health, and the environment have become more severe. These changes called for a thoroughly revised and updated marine painting manual. I believe that the editor should be congratulated on having completed this task in such a commendable way. I hope that this new volume will find as enthusiastic a response among those concerned with maritime affairs as its predecessor did some fifteen years ago. Dr. Jan Raat, Director, Netherlands Foundation for the Coordination of Maritime Research. The Marine Painting Manual sets out to provide clear guidelines for the effective protection of marine structures: ocean-going vessels and offshore platforms. Painting is a high-cost procedure and is a crucial factor in determining the life and subsequent maintenance of steel structures in the marine environment. The book is a follow-up to the Ship Painting Manual published in 1975. It has been completely revised, partly rewritten, and an additional chapter on offshore structures included. The present volume contains detailed and up-to-date information on all aspects of the preparation and painting for the protection of marine structures.
