Robert Brandom's *Making It Explicit* (1994) marks a Copernican turn in the philosophy of mind and language as this collection of critical essays together with Brandom's enlightening answers convincingly shows though faithful to Wittgenstein's pragmatic turn in spirit Brandom gives a systematic account of human sapience as a whole by grounding our relation to the world by words on our discursive practice assessing its normative basis which is instituted by scorekeeping activities and sanctioning attitudes and thus trying to avoid mystifying mentalism as well as dogmatic naturalism in our account of the human spirit the topics emphasized in this volume concern the place of Brandom's inferentialist and normative semantics in 20th century philosophy of language Frege Carnap Quine also in comparison to cognitive linguistics Chomsky instrumentalist pragmatism and functionalist understanding of the use of signs Sellars deflation of intentionality Brentano the logical analysis of predicative structures Kant the role of constructions for understanding the constitution of objectivity by *de re* ascriptions and the problem of anti-representationalism or how to treat malapropisms Davidson this volume was originally published as a special issue of *Pragmatics & Cognition* 13:1 (2005)

## The Pragmatics of Making it Explicit

2008

Nanotechnology as shortly described as the study of manipulating matter on an atomic and molecular scale is one of the most dynamic and promising industries receiving a great deal of attention from researchers business leaders investors and policymakers around the world in making it to the forefront Nesli Aydoğan Duda has assembled a distinguished group of authors to analyze the particular challenges and opportunities of nanotechnology emergence and management in the developing world in so doing they address the issues from several angles ranging from cultural issues to capital markets industrial clusters to government policy and legal structure drawing from in depth research and case studies in Turkey Latin America India China and Iran and a comparison with the development of the industry in the United States the authors present a cross-cultural approach with particular emphasis on the strategic nature of the nanotechnology industry for economic development consumer welfare and homeland security among the topics they consider are the importance of knowledge transfer from universities to the market and more generally the interface between science and its commercialization and the institutional infrastructure that is necessary to maximize the potential of science and technology in doing so the authors provide unprecedented theoretical and empirical contributions to the study of nanotechnology and more generally insight into the complex business political and cultural environment that must be established in order for such an industry to thrive in the context of a developing country
