Advances in Renewable Energies Offshore 2014-10-14 this study of india s political economy provides a thorough examination of one critique of globalization that it causes economic segmentation and possibly disintegration of the national economy as some sectors benefit and others are left behind economic segmentation is the breaking up of national markets resulting in distinct winners and losers nayar s examination challenges this critique by demonstrating that on balance the active role of the indian state in the areas of economic planning fiscal federalism and tax reform has resulted in improved economic integration not increased segmentation similarly his investigation of trade investment entrepreneurship and migration all reveal tendencies inherent in the market in favor of economic integration especially when assisted by the state nayar s findings lead to the conclusion that while globalization both offers benefits greater economic growth and involves costs external shocks india s experience since its opening in 1991 suggests that
