theologians for their part often further their own reflections on the subject independently of developments in the field of exegesis with the risk of remaining purely theoretical biblical research in the last decades has been marked by new insights about the nature of the biblical texts stemming from the study of their inner plurality insofar as they combine and sometimes intertwine conflicting theologies of their textual fluidity and of their reception can these new insights be integrated into a theological reflection on the notion of inspiration these questions are often explicitly raised about the jewish and christian scriptures but they also prove increasingly relevant for qur ānic studies this volume addresses them through contributions from exegetes of the bible and of the qur an and systematic theologians at a time of renewed interest in empire this stimulating volume explores the complex relationship between the bible and the colonial enterprise and examines some overlooked aspects of this relationship these include unconventional retellings of the gospel story of jesus by thomas jefferson and raja rammohun roy the fate of biblical texts when marshalled by victorian preachers to strengthen british imperial intentions after the india uprising of 1857 the cultural political use of the christian old testament first by the invaders to attack temple practices and rituals then by the invaded to endorse the temple heritage scorned by missionaries the dissident hermeneutics of james long and william colenso confronting digital systems compromising with colonial ambitions and principles

today across the course of american history  
imperialism and anti imperialism have been  
awkwardly paired as influences on the politics  
culture and diplomacy of the united states the  
declaration of independence after all is an anti  
imperial document cataloguing the sins of the  
metropolitan government against the colonies with  
the revolution and again in 1812 the nation stood  
against the most powerful empire in the world and  
declared itself independent as noted by ian  
tyrrell and jay sexton however american anti  
imperialism was clearly selective geographically  
racially and constitutionally empire s twin  
broadens our conception of anti imperialist actors  
ideas and actions it charts this story across the  
range of american history from the revolution to  
our own era and it opens up the transnational and  
global dimensions of american anti imperialism by  
tracking the diverse manifestations of american  
anti imperialism this book highlights the  
different ways in which historians can approach it

the concept of inspiration is part and parcel of the theological tradition in several religious confessions but it has largely receded to the background if not vanished altogether in the discussions of biblical scholars the question do we still need inspiration might well reflect the perplexity of many exegetes today systematic theologians for their part often further their own reflections on the subject independently of developments in the field of exegesis with the risk of remaining purely theoretical biblical research in the last decades has been marked by new insights about the nature of the biblical texts stemming from the study of their inner plurality insofar as they combine and sometimes intertwine conflicting theologies of their textual fluidity and of their reception can these new insights be integrated into a theological reflection on the notion of inspiration these questions are often explicitly raised about the jewish and christian scriptures but they also prove increasingly relevant for qur ānic studies this volume addresses them through contributions from exegetes of the bible and of the qur an and systematic theologians
