The Industrial Revolution in Britain 1994-04-06 excerpt from industrial relations vol 1 final report and testimony submitted to congress by the commission on industrial relations created by the act of august 23 1912 in such communities democratic government does not as a rule exist except in name or form and as a consequence there now exist within the body of our republic industrial communities which are virtually principalities oppressive to those dependent upon them for a livelihood and a dreadful menace to the peace and welfare of the nation such conditions as these are the direct and inevitable consequence of the industrial relations which exist in such communities political freedom can exist only where there is industrial freedom political democracy only where there is industrial democracy such industrial democracy has been established in a greater or less degree in certain american industries or for certain classes of employees but between conditions of industrial democracy and industrial feudalism there are almost infinite gradations marking the stages of evolution which have been reached in every case however investigation has shown that the degree of political freedom and democracy which exists is conditioned by the industrial status of the citizens who form the majority of the community the problems of industrial relations therefore demand the attention of congress not only because they determine the life security and happiness of the citizens of the united states who occupy the position of wage earners but because they affect for good or evil the government of localities and states and to a smaller degree that of the nation itself what each of these wage earners shall eat what he shall wear where he shall live and how long and under what conditions he shall labor are determined by his industrial status and by his relation individually or collectively to the person or corporation employing him similarly and almost as directly this relationship determines whether the machinery of government shall be used for or against his welfare whether his vote shall count for or against his own interest whether he shall be tried by a jury of his peers or a jury selected in collusion with the employing company or under conditions of so called martial law by no jury whatever whether in fact he shall be a free man or be deprived of every right guaranteed by federal and state constitutions imprisoned without warrant for the commission of crimes of which he may be innocent or forcibly deported from the community or state in which he has made his home for these reasons it seems desirable at the outset to suggest a recommendation to congress that these problems of industrial relationship should occupy their due prominence in the deliberations of that honorable body and that the entire machinery of the federal government should be utilized to the greatest possible degree for the correction of such deplorable conditions as have been found to exist about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

□□□□ 1 2006-02 industrialization supported by industrial hubs has been widely associated with structural transformation and catch up but while the direct economic benefits of industrial hubs are significant their value lies first and foremost in their contribution as incubators of industrialization production and technological capability and innovation the oxford handbook of industrial hubs and economic development adopts an interdisciplinary approach to examine the conceptual underpinnings review empirical evidence of regions and economies and extract pertinent lessons for policy researchers and practitioners on the key drivers of success and failure for industrial hubs this handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization economic structural transformation and technological catch up it explores the implications of emerging issues and trends such as environmental protection and sustainability technological advancement shifts in the global economy and urbanization

Industrial Relations, Vol. 1 2017-10-31 excerpt from industrial peace vol 1 the object of these pages is to contribute towards the maintenance of industrial peace we believe that the spread of syndicalism and the fomenting of class antagonism is harmful to labour as well as to capital we are convinced that the common national interest can best be served by the establishment of some form of co operation between labour management and finance which will enable this country to maintain her position as a great power whilst securing a decent and prosperous standard of living to the workers who we strongly hold have an inherent right to be safeguarded against all preventable poverty unemployment and exploitation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
