The New Universal English and Italian Dictionary, Etc 1849 unlike the many magazines that revolve around the architectural world ardeth concerns neither with outcomes architecture nor with the authors

architects' concerns instead with their operational work, i.e. projects. The shift from subjects to their good intentions as taught in universities and reclaimed in the profession to objects, the products of design at work within the social system that contains them, engenders an analytical and falsifiable elaboration of the complex mechanisms that an open practice such as design involves through a process of disciplinary redefinition. Ardenne explores the falsifiability of design hypotheses as the object that allows the project to scientifically confront errors and approximations.

Francia settentrionale e centrale 2011-11-16 this volume brings together a series of studies of morphological processing in Germanic, English, German, Dutch, Romance, French, Italian, and Slavic, Polish, Serbian languages. The question of how morphologically complex words are organized and processed in the mental lexicon is addressed from different theoretical perspectives: single and dual route models for different modalities (auditory and visual comprehension, writing) and for language development. Experimental work is reported as well as computational and statistical modeling. Thus, this volume provides a useful overview of the range of issues currently attracting research at the intersection of morphology and psycholinguistics.
