with the cost of heating oil and electricity fluctuating wildly consumers are clamoring for information on alternative energy this source book covers all the relevant technologies including solar space and water heating as well as photovoltaic electricity

Fundamentals of Solar Heating 1978

the handbook for convenient use is divided into eight main units 1 the solar resource 2 solar thermal collectors 3 photovoltaics 4 bioconversion 5 wind energy 6 solar energy storage systems 7 applications of solar energy 8 non technical issues in addition there are three appendixes containing unit conversion tables and useful solar data it became obvious early in this project that if proper coverage were to be given each of these areas it would be necessary to divide the handbook into two volumes the first six units constitute part a engineering fundamentals and the last two units constitute part b applications systems design and economics these volumes have been prepared primarily as reference books but it is felt that many of the sections will prove useful for practicing engineers scientists and students

Public Swimming Pool Management 1985*

this book studies war narratives and their role in the political arenas of post conflict societies with a focus on the former yugoslavia how do politicians in postwar societies talk about the past war how do they discursively represent vulnerable social groups created by the conflict does the nature of this representation depend on the politicians ideology personal characteristics or their record of combat service the book answers these questions by pairing natural language processing tools and large corpora of parliamentary debates collected in three southeast european post conflict societies bosnia herzegovina croatia and serbia using the latest advances in computer science the book explores patterns in the war discourse of the political elites of these countries and discusses how politicians talk about war in terms of common narratives and shared frameworks mapping over 20 years of parliamentary debates the book presents a new perspective on the role of the legacies of war in public space and develops theoretical arguments about reconciliation in post conflict societies the wars of the 1990s and the breakup of yugoslavia have created three totally different settings for remembering the past conflicts in these countries despite their common history it is a story of victorious battles croatia past grievances bosnia herzegovina and denial serbia showing the different flavors of past wars in various national contexts that are symptomatic of many post conflict societies in different parts of the world this book will be of much interest to students of war and conflict studies southeastern european politics discourse analysis and international relations
