air pumps electrical machines colliding ivory balls coloured sparks mechanical planetariums magic mirrors hot air balloons these are just a sample of the devices displayed in public demonstrations of science in the eighteenth century public and private demonstrations of natural philosophy in europe then differed vastly from today s unadorned and anonymous laboratory experiments science was cultivated for a variety of purposes in many different places scientific instruments were built and used for investigative and didactic experiments as well as for entertainment and popular shows between the culture of curiosities which characterized the seventeenth century and the distinction between academic and popular science that gradually emerged in the nineteenth the eighteenth century was a period when scientific activities took place in a variety of sites ranging from academies and learned societies to salons and popular fairs shops and streets this collection of case studies describing public demonstrations in britain germany italy and france exemplifies the wide variety of settings for

scientific activities in the european enlightenment filled with sparks and smells the essays raise broader issues about the ways in which modern science established its legitimacy and social acceptability they point to two major features of the cultures of science in the eighteenth century entertainment and utility experimental demonstrations were attended by apothecaries and craftsmen for vocational purposes at the same time they had to fit in with the taste of both polite society and market culture public demonstrations were a favourite entertainment for ladies and gentlemen and a profitable activity for instrument makers and booksellers
