Career, Aptitude and Selection Tests 2008

the current operational fast battery is scored by hand more than 90 of the time quality checks at milpercen and reports from field testing locations reveal a high error rate among hand scored tests this required establishing a quality control system in 1975 by which fast test scores are checked by hand at milpercen thus it was apparent that a desirable test battery would be one which was easier to administer and which could be checked by machine at the time the fast was originally developed provisions were made for further analysis to shorten the battery and provide more effective prediction of training performance this research represents an effort to accomplish these objectives and

to develop a single fast battery for all applicants consisting of fewer shorter and more easily scored component tests a principal objective in the revision effort was to shorten the battery to accomplish this the following two phase approach was applied first the number of tests included in the battery was reduced by factor analysis and stepwise multiple correlation second items in each of the more predictive tests were subjected to item analysis procedures to retain the more valid items and eliminate the less effective ones

Ultimate Aptitude Tests 2010-12-01
