by the late 1970s state communism was everywhere in retreat first in eastern europe then in china and the soviet union party leaders were compelled to devise fundamental departures from the economic procedures and structures they had confidently installed at the outset of their revolutionary victories perhaps no country departed more rapidly from communist economic structures than china within five years of mao zedong's death reformers led by deng xiaoping had dismantled the people's communes and created a range of markets that established the institutional foundations for a new form of socialism but unlike the soviets and eastern europeans the chinese reformers refused to consider parallel changes in political institutions the demonstrations in beijing in 1989 made it clear that post mao economic policies had created

unavoidable political consequences for the society and its leaders in individual case studies the twelve contributors to this volume document the uneven decollectivization and decentralization of china s economy in the post mao years and the great diversity of the social and political consequences they deal with the effects of the more materialistic and individualistic reward system on both public and private life in the countryside and in urban settings and the new expectations that economic changes engendered

china s bold program of reforms launched in the late 1970s the move to a market economy and the opening to the outside world ended the political chaos and economic stagnation of the cultural revolution and sparked china s unprecedented economic boom yet while the reforms made possible a rising standard of living for the majority of china s population they came at the cost of a weakening central government increasing inequalities and fragmenting society the essays of barry naughton joseph fewsmith paul h b godwin murray scot tanner lianjiang li and kevin j o brien tianjian shi martin king whyte thomas p bernstein dorothy j solinger david s g goodman kristen parris merle goldman elizabeth j perry and richard baum and alexei shevchenko analyze the contradictory impact of china s economic reforms on its political system and social structure they explore the changing patterns of the relationship between state and society that may have more profound significance for china than all the revolutionary movements that have convulsed it through most of the twentieth century

Beyond Regimes 2020-10-26

this book examines citizenship as practiced in china today from a variety of angles citizenship in china and elsewhere in the global south has often been perceived as either a distorted echo of the real democratic version in europe and north america or an orientalized other that defines what citizenship is not by contrast this book sees chinese citizenship as an aspect of a connected modernity that is still unfolding the book focuses on three key tensions a state preference for sedentarism and governing citizens in place vs growing mobility sometimes facilitated by the state a perception that state building and development requires a strong state vs ideas and practices of participatory citizenship and submission of the individual to the collective state community village family etc vs the rising salience of conceptions of self development and self making projects examining manifestations of these tensions can contribute to thinking about citizenship beyond china including the role of the local in forming citizenship orders how individualization works in the absence of liberal individualism and how social citizenship is

increasingly becoming a reward to good citizens rather than a mechanism for achieving citizen equality this book was originally published as a special issue of the journal citizenship studies

the limits of change disputes the impression that the conservative ideas and styles of china s republican period were neither strong nor persuasive enough to counter the ideas or the revolution of mao as the contributors to the book point out these conservative movements reflected a modern outlook and shared a framework of common concepts with the radical movements they opposed in these essays we see the broad range of responses that conservatism in the republican period took from a new nativist historical consciousness to quasi fascist theories of political
