this volume is based upon my ancient history and mediæval and modern history in some instances i have changed the perspective and the proportions of the narrative but in the main the book is constructed upon the same lines as those drawn for the earlier works in dealing with so wide a range of facts and tracing so many historic movements i cannot hope that i have always avoided falling into error i have however taken the greatest care to verify statements of fact and to give the latest results of discovery and criticism

## Outsiders in the Greek Cities in the Fourth Century BC (Routledge Revivals)

2014-02-04

during the fourth century bc the number of greeks who did not live as citizens in the city states of southern mainland greece increased considerably mercenaries pirates itinerant artisans and traders their origins differed widely it has

been argued that this increase was caused by the destruction of many greek cities in the wars of the fourth century accompanied by the large programme of settlement begun by alexander in the east and timoleon in the west although this was an important factor argues dr mckechnie more crucial was an ideological deterioration of loyalties to the city the polis was no longer absolutely normative in the fourth century and hellenistic periods with so many outsiders with specialist skills alexander and his successors were able to recruit the armies and colonists needed to conquer and maintain empires many times larger than any single polis had ever controlled
