Building Construction 2001 assessment of professional competence for project managers and the measure of project success is well trodden ground in the research and professional project management literature whilst standards and certifications like pmbok and the ipma competence baseline have been developed as a guide for the development of project managers competence the manifestation of these competencies into good performance is neither guaranteed nor always easily ascertainable this book presents a brand new comprehensive and reliable quantitative tool to assess the performance of a construction project manager though the performance of a project construction manager may be judged on time and cost criteria of a project there is still no one conclusive evaluation tool based on the varied criteria or competencies that are usually ascribed to them this book develops a performance index for construction project professionals which can be indicative of their performance measured over varied attributes over the lifetime of their professional development this index has the potential to provide all project stakeholders with better control over selecting appropriate resources for managing projects and drive the project professional from within towards improving his her credentials with every project this book can be used by aspiring and practising project managers for measuring their own performance and assessing their relative strengths and weaknesses organizations can use the tool as a benchmark to select the best of their human resources for their projects and training institutions can use the tool to set a baseline highlight areas for intervention and indicate the readiness of trainees to face real world projects

Building Materials and Construction 2021-12-14 engineering has been an aspect of life since the beginnings of human existence the earliest practice of civil engineering may have commenced between 4000 and 2000 bc in ancient egypt the indus valley civilization and mesopotamia ancient iraq when humans started to abandon a nomadic existence creating a need for the construction of shelter during this time transportation became increasingly important leading to the development of the wheel and sailing civil engineering is the application of physical and scientific principles for solving the problems of society and its history is intricately linked to advances in the understanding of physics and mathematics throughout history because civil engineering is a broad profession including several

specialized sub disciplines its history is linked to knowledge of structures materials science geography geology soils hydrology environmental science mechanics project management and other fields throughout ancient and medieval history most architectural design and construction was carried out by artisans such as stonemasons and carpenters rising to the role of master builder knowledge was retained in guilds and seldom supplanted by advances structures roads and infrastructure that existed were repetitive and increases in scale were incremental the purpose of this textbook is to present an introduction to the subject of basics of civil engineering of bachelor of engineering be semester i the book contains the syllabus from basics of the subjects going into the intricacies of the subjects students are now required to solve minimum four 4 assignments based on the syllabus each topic is followed by assignment questions which now forms the compulsory part of internal assessment all the concepts have been explained with relevant examples and diagrams to make it interesting for the readers an attempt is made here by the experts of tmc to assist the students by way of providing study text as per the curriculum with non commercial considerations we owe to many websites and their free contents we would like to specially acknowledge contents of website wikipedia com and various authors whose writings formed the basis for this book we acknowledge our thanks to them at the end we would like to say that there is always a room for improvement in whatever we do we would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful readers can email their queries and doubts to tmcnagpur gmail com we shall be glad to help you immediately dr mukul burghate author
