Cardboard in Architecture

2008-01-17

the department of building technology at the faculty of architecture at tu delft is studying and developing cardboard as a potential building material on a broad systematic and where possible comprehensive basis the guiding research question is how can cardboard be used in both architectural and structural terms as a fully fledged building material making use of the material specific properties an exploratory phase from 2003 to 2005 including an outdoor pilot structure multi shed a pilot pavilion accommodating an exhibition workshops on resistance to fire and to damp a first patent kcpk the design of an interior wall besin and the publication of this book was concluded by an international symposium attended by both the paper industry and the building

industry this publication comprises the report on that symposium

Book Production

2012-08-06

the digital revolution has brought with it a wider range of options for creating and producing print on paper products than ever seen before with the growing demand for skills and knowledge with which to exploit the potential of digital technology comes the need for a comprehensive book that not only makes it possible for production staff editors and designers to understand how the technology affects the industry they work in but also provides them with the skills and competencies they need to work in it smartly and effectively this book is designed to satisfy this need book production falls into two parts the first part deals with the increasingly important role of production as project managers a role which has not been adequately written about in any of the recent literature on publishing the second part deals with the processes and raw materials used in developing and manufacturing print on paper products case studies are used to illustrate why and how some processes or raw materials may or may not be appropriate for a particular job with expert opinions and case studies and a consideration of the practices and issues involved this offers a comprehensive overview of book production for anyone working or training to work in or in conjunction with the books industry
