problem solving is a fixture in life you have to be able to solve problems problems pop up every day sometimes they are small and sometimes they are large sometimes solving a problem is a matter of life and death and other times it is merely a matter of keeping your sanity regardless of why you need problem solving you cannot deny that you need it if you are a parent then problem solving is a skill you no doubt could not live without children are full of problems and as the parent it is up to you to help them find the solution sometimes you have to be creative because problems that come up can sometimes be quite difficult to solve without a little creative thinking the same can be said in business businesses have plenty of problems and it is up to the employees to find a way to solve those problems again sometimes simple problem solving techniques just are not going to work because some problems require more problem solving skills you run into problems every day from flat tires to saving a failing product line you are a problem solver and you probably do not even realize it you should pay attention to your problem solving skills it is common for people to take problem solving for granted we do it so much that it is not hard to believe that it becomes second nature it is this familiarity with problem solving that leads up to take it for granted and to not be creative with our problem solving anymore if you think about how you solved problems when you were a child chances are that you were much more creative then now you likely go straight to the tried and true methods instead of trying new things the problem with this is that taking problem solving for granted can make you a lazy problem solver you may no longer spend time trying to solve a problem but rather go to a tried and true solution it may not be the best solution but since you are a lay problem solver you do not take the time to actually use your problem solving skills to try to come up with a better solution problem solving can be an amazing process but it is up to you to make it that way instead of just something you do because you have to you have the ability to become a great problem solver but you have to begin looking at it as an art
