Initiation

1974

at the request of her students haich wrote initiation a unique autobiographical novel bringing together the life story of a woman in the 20th century with the full measure of events and experiences that contributed to her spiritual growth and vivid recollections of her earlier life experiences as a young priestess in ancient egypt the story within a story emerges describing in exciting detail how the woman is prepared for initiation by the high priest ptahhotep who leads her step by step in harmony with her development to an understanding of the ultimate mysteries the novel ends as it begins in the present revealing the subtle relationship between the two worlds and an exhilarating view of human destiny page 4 of cover

many cultures accept that a person may die and then come back to life in another form but westerners have traditionally rejected the idea recently however surveys conducted in europe indicate a substantial increase in the

number of europeans who believe in reincarnation and numerous claims of reincarnation have been reported this book examines particular cases in europe that are suggestive of reincarnation the first section provides a brief history of the belief in reincarnation among europeans the second section considers eight cases from the first third of the twentieth century that were not independently investigated but were reported and sometimes published by the persons concerned the third section covers 32 cases from the second half of the twentieth century that were investigated by the author many of these cases involved either children who exhibited unusual behavior attributed to a previous life or adults who experienced recurrent or vivid dreams attributed to a previous life in the fourth section the author compares european cases suggestive of reincarnation with those of other countries and cultures

The Day with Yoga

2001-07-01

this book relates the path to higher consciousness through the colour shape and symbolic forms on the twenty two tarot cards detailed study and meditation of each card may release internally all that is involved with each level encountered on the journey towards the light these cards may be used in

conjunction with the text or separately for meditation when studied individually a card can reveal the necessary steps that need to be taken to actualise one's potential tarot cards or symbolic representations of the truth have always been used to help man relate not only with the mind but internally through the feelings invoked by the colours and forms the nature of these cards is that they can produce a strong awakening of one's unconscious forces they are like a spiritual mirror in which we can recognise and examine ourselves we can then understand that the reasons for our fate lie within ourselves and changes by the mere fact that we begin to react differently to everything that happens to us these cards with the text are a valuable key to understand our present state our past and in a deeper sense how we create our future included in the book are 22 pages of five colour tarot illustrations

The History of the Occult Tarot

2013-07-18

millions are wondering what the future holds for mankind and if we are soon due for a world changing global shift paramhansa yogananda author of the classic autobiography of a yogi and his teacher sri yukteswar offered key insights into this subject they presented a

fascinating explanation of the rising and falling eras that our planet cycles through every 24 000 years according to their teachings we have recently passed through the low ebb in that cycle and are moving to a higher age an energy age that will revolutionize the world over one hundred years ago yukteswar predicted that we would live in a time of extraordinary change and that much that we believe to be fixed and true our entire way of looking at the world would be transformed and uplifted in the yugas authors joseph selbie and david steinmetz present substantial and intriguing evidence from the findings of historians and scientists that demonstrate the truth of yukteswar s and yogananda s revelations

recent years have seen a spectacular rise of the new age movement and an ever increasing interest in its beliefs and manifestations this fascinating work presents the first ever comprehensive analysis of new age religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement making extensive use of primary sources the author thematically analyses new age beliefs from the perspective of the study of religions while looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the renaissance

hanegraaff finally shows how the modern new age movement emerged from the increasing secularization of those esoteric traditions during the 19th century this ground breaking publication is compulsive reading for all those involved or interested in the new age movement

this book focuses on yoga s transcultural dissemination in the twentieth and twenty first centuries in the course of this process the term yoga has been associated with various distinctive blends of mental and physical exercises performed in order to achieve some sort of improvement whether understood in terms of esotericism fitness self actualization body aesthetics or health care the essays in this volume explore some of the turning points in yoga s historico spatial

evolution and their relevance to its current appeal the authors focus on central motivations sites and agents in the spread of posture based yoga as well as on its successive re interpretation and diversification addressing questions such as why has yoga taken its various forms how do time and place influence its meanings social roles and associated experiences how does the transfer into new settings affect the ways in which yogic practice has been conceptualized as a system and on what basis is it still identified as indian yoga the initial section of the volume concentrates on the re evaluation of yoga in indian and western settings in the first half of the twentieth century the following chapters link global discourses to particular local settings and explore meaning production at the micro social level taking germany as the focal site the final part of the book focuses on yoga advertising and consumption across national social and discursive boundaries taking a closer look at transnational and deterritorialized yoga markets as well as at various classes of mobile yoga practitioners

this is the first book to address the social organisation of modern yoga practice as a primary focus of investigation and to undertake a comparative analysis to explore why certain styles of yoga have successfully transcended geographical boundaries and endured over time whilst others have dwindled and failed using fresh empirical data of the different ways in which posture practice was disseminated transnationally by krishnamacharya sivananda and their leading disciples the book provides an original perspective the author draws upon extensive archival research and numerous fieldwork interviews in india and the uk to consider how the field of yoga we experience today was shaped by historic decisions about how it was transmitted the book examines the specific ways in which a small group of yogis organised their practices and practitioners to popularise their styles of yoga to mainstream audiences outside of india it suggests that one of the most overlooked contributions has been that of sivananda saraswati 1887 1963 for whom this study finds his early example acted as a cornerstone for the growth of posture practice outlining how yoga practice is organised today on the world stage how leading brands fit into the wider field of modern yoga practice and how historical developments led to a mainstream globalised practice this book

will be of interest to researchers in the field of yoga studies religious studies hindu studies south asian history sociology and organisational studies
