a devastating terrorist bomb blast at a spiritual retreat outside santa fe new mexico sends journalist kevin pitcairn and his beloved emmy on a quixotic quest to understand the roots of violence traveling across the country deep into the bowels of southern appalachia their search takes them through a long standing rift in the american consciousness to confrontations with remarkable and anomalous characters some of them deeply spiritual others well grounded in research and psychology in this sequel to the much acclaimed a killer's grace pitcairn and emmy return to the exploration of innocence while adding to it a deepening understanding of injury and ordeal and its amazing corollary of post traumatic growth as the quest and its dangers rip their lives apart doors open that lure them back and forth across the country in search of tendrils tying together the events and anguish as well as bringing the protagonists more deeply together

## **Dark Side of Earth**

1970-10-01

in this book one of the world's leading social theorists presents a critical, alarmed but also nuanced understanding of the post-traditional world we inhabit today. Jeffrey Alexander writes about modernity as historical time and social condition but also as ideology and utopia. The idea of modernity embodies the enlightenment's noble hopes for progress and rationality but its reality brings great suffering and exposes the destructive impulses that continue to motivate humankind. Alexander examines how twentieth-century theorists struggled to comprehend the Janus-faced character of modernity, which looks backward and forward at the same time. Weber linked the triumph of worldly asceticism to liberating autonomy but also ruthless domination, describing flights from rationalization as systemic and dangerous. Simmel pointed to the otherness haunting modernity even as he normalized the stranger. Eisenstadt celebrated axial age transcendence but acknowledged its increasing capacity for barbarity. Parsons heralded American community but ignored modernity's fragmentations rather than seeking to resolve modernity's contradictions. Alexander argues that social theory should accept its Janus-faced character; it is a dangerous delusion to think that modernity can eliminate evil. Civil inclusion and anti-civil exclusion are intertwined. Alexander enumerates dangerous frictions endemic to modernity but he also suggests new lines of social amelioration and emotional repair.
