in the one hundred and ten years covered by volume four of the oxford history of literary translation in english what characterized translation was above all the move to encompass what goethe called world literature this occurred paradoxically at a time when english literature is often seen as increasingly self sufficient in europe the culture of germany was a new source of inspiration as were the medieval literatures and the popular ballads of many lands from spain to serbia from the mid century the other literatures of the north both ancient and modern were extensively translated and the last third of the century saw the beginning of the russian vogue meanwhile as

the british presence in the east was consolidated translation helped readers to take possession of exotic non european cultures from persian and arabic to sanskrit and chinese the thirty five contributors bring an enormous range of expertise to the exploration of these new developments and of the fascinating debates which reopened old questions about the translator s task as the new literalism whether scholarly or experimental vied with established modes of translation the complex story unfolds in britain and its empire but also in the united states involving not just translators publishers and readers but also institutions such as the universities and the periodical press nineteenth century english literature emerges as more open to the foreign than has been recognized before with far reaching effects on its orientation

how should we live according to philosopher and biologist massimo pigliucci the greatest guidance to this essential question lies in combining the wisdom of 24 centuries of philosophy with the latest research from 21st century science in answers for aristotle pigliucci argues that the combination of science and philosophy first pioneered by aristotle offers us the best possible tool for understanding the world and ourselves as aristotle knew

each mode of thought has the power to clarify the other science provides facts and philosophy helps us reflect on the values with which to assess them but over the centuries the two have become uncoupled leaving us with questions about morality love friendship justice and politics that neither field could fully answer on its own pigliucci argues that only by rejoining each other can modern science and philosophy reach their full potential while we harness them to help us reach ours pigliucci discusses such essential issues as how to tell right from wrong the nature of love and friendship and whether we can really ever know ourselves all in service of helping us find our path to the best possible life combining the two most powerful intellectual traditions in history answers for aristotle is a remarkable guide to discovering what really matters and why
