george ritzer is one of the leading social and cultural commentators of the present day in this essential new book he considers some of the main tendencies in contemporary social theory included here are ritzer s latest reflections on the uses and misuses of metatheory according to ritzer sociology is a multiparadigm science the differences and intensities of rivalries between paradigms are often very confusing for students and even for professional sociologists this book seeks to find a way out of the confusion by sketching out the lineaments of a new integrated sociological paradigm and demonstrates how this paradigm can be applied it shows the various

ways in which ritzer has developed rationalization theory to shed light on professional integration the shape of consumer culture hyperrationality and the state of sociology today

this book addresses the problem of the transition to new forms of social order in the global world as a haunting sense of historical discontinuity pervades western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world the book draws on the theoretical work produced in the five volumes of the springer series social morphogenesis and applies it in a sustained and concerted approach to the empirical

examination of macro social change the first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions the second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations lastly the third part examines the anthropological consequences of these societal trends focusing on self and character as well as on human fulfillment and the good life
