Psychological development in health and disease 1969 a worldwide collaborative effort to measure the impact of health problems on people the global burden of diseases injuries and risk factors study gbd is coordinated by the institute for health metrics and evaluation at the university of washington in seattle data for the project are collected and analyzed by 1 870 collaborators from 124 countries and three territories gbd uncovers the toll of early death and disability caused by more than 300 diseases and injuries in 195 countries and territories from 1990 to the present its methods and metrics emphasize comparability among causes that kill and causes that disable the gbd is frequently updated using new data to improve past and present estimates of disease burden the gbd 2015 study shows that from 1990 to 2015 the world as a whole has been undergoing an epidemiological transition the nature of that transition is discussed in this document in a brief overview of some key gbd 2015 results

Rethinking Development and Health 2016 the geographies of health and development is an emerging sub discipline tying in with many of the conceptual theoretical and practical components of other disciplines working in health health care economics and international development spatially and theoretically grounded in geography this collection offers a fresh perspective on the dialectic relationships between health and development health problems in a developing context take on much higher rates of prevalence as a result of the varied cultural structural and economic vulnerabilities of the people they impact this book begins by exploring some of the circumstances surrounding the distinctive health inequities currently facing many developing countries including malaria maternal mortality and hiv aids this is followed by a discussion of how matters of physical access and human resource issues and perhaps most importantly the challenges of financing together shape the access and utilization of health care examining how the environment interacts to influence the health of the people that live there the next section includes discussion around challenges of food in security and the importance of clean and uncontaminated water for health finally the book explores the influence of globalization on health specifically within the urban environment against the backdrop of global health policy

Geographies of Health and Development 2015-03-28 this textbook examines strategies of investing in human health and investing in economic growth as distinct approaches to development it explores the symbiotic relationship of these tactics and considers the applications and outcomes from a global national and community level perspective each chapter introduces concepts of economic development and population health and uses case studies to illustrate the same these case studies include program and policy examples from bangladesh chile haiti rwanda south africa and sri lanka the textbook also examines the impact of macroeconomic adjustment programs health care restructuring investment in primary health care public private partnerships and the challenges of program coordination and up scaling in stable and conflict ridden countries discussion questions are provided at the end of each chapter to facilitate classroom activities solutions are provided at the end of the textbook

Psychological Development in Health and Disease 1969 first published in 1991 with any new area of research particularly one in which development has been so rapid and influential it is important to take stock of progress and identify critical issues health psychology shows great potential both as a research area and a profession and the careful planning of good quality research and of appropriately structured training programs if imperative if this potential is to be realised this book

explores the way in which this discipline has developed internationally and the nature of different types of training programs which have emerged this book is intended for health psychologists who are interested in the latest developments in their field around the world and will be particularly valuable to those responsible for training programs

Challenges in Health and Development 2017-03-06 this collection of critical ideas relating organization science to operations and accomplishments in the health care environment provides a thematic guide for leaders practitioners academics and administrators it pulls in a broad cross section of perspectives on the important linkage of scholarship and practice with a solid global perspective

The International Development of Health Psychology 1991 this book provides an overview of investigations into the interrelations between stressful living conditions individual coping strategies and social support networks on the one hand and physiological psychological and social health on the other health is used as a broad term and is defined as a state of physical and mental well being by which an individual is capable of processing inner and outer reality in a productive and satisfying manner the potential stresses and strains inherent in the lifestyles of children adolescents and adults in contemporary industrial societies are the prime concern of this book i try to offer a comprehensive view which takes modern socialization theory as its starting point chapter 1 introduces the subject and discusses the psychological and social costs that accompany life within modern industrial society chapter 2 reviews research on types and distribution of social psychological and somatic disorders chapter 3 explores the risk factors and constellations of stressful life events role conflicts and transitions and focuses on the changes in types of demand or strains throughout the life span chapter 4 contains an analysis of the personal and social resources that can be mobilized if stress occurs

Organization Development in Healthcare 2011-07-12 reliable information on how health service strategies affect the poor is in short supply in an attempt to redress the imbalance improving health service delivery in developing countries presents evidence on strategies for strengthening health service delivery based on systematic reviews of the literature quantitative and qualitative analyses of existing data and seven country case studies the authors also explore how changes in coverage of different health services affect each other on the national level finally the authors explain why setting international targets for health services has been not been successful and offer an alternative approach based on a specific country s experience the book s findings are clear and hopeful there are many ways to improve health services measuring change and using information to guide decisions and inform stakeholders are critically important for successful implementation asking difficult questions using information intelligently and involving key stakeholders and institutions are central to the learning and doing practices that underlie successful health service delivery

Human Development and Health 1989 health economists should consider the advantages of viewing a country s health system not only as a unique industry that produces both health care and high technology goods and services but that it also possess the ability to stimulate development of a broader array of high technology industries development and industrial economists and policymakers will also see the health sector from this different and innovative perspective

Improving Health Service Delivery in Developing Countries 2009 this title was first published in 2002 health systems across the globe face similar problems controlling costs while maintaining or improving health care quality and access notwithstanding the unprecedented health system reforms of the past decades many outstanding problems remain in these areas drawing on experts from europe and america this eclectic collection of leading edge research examines the impact of organizational development on improving quality and efficiency in health care a series of chapters provide accounts of organizational reconfiguration in the uk and elsewhere the contributors examine how structural and procedural changes must be matched by the development of human resource services if increases in efficiency and effectiveness are to be achieved the book will be of interest to health care academics policy makers managers and practitioners who are interested in keeping abreast of the latest developments in health care research

Health Policy and High-tech Industrial Development 2005-01-01 in mexico city or nairobi or manila a young girl in one part of the city is near death with measles while not far away an elderly man awaits transplantation of a new kidney how is one denied a cheap simple and effective remedy while another can command the most advanced technology medicine can offer can countries

like mexico kenya or the philippines with limited funds and medical resources find an affordable effective and fair way to balance competing health needs and demands such dilemmas are the focus of this insightful book in which leading international researchers bring together the latest thinking on how developing countries can reform health care the choices these poorer countries make today will determine the pace of health improvement for vast numbers of people now and in the future exploring new ideas and concepts as well as the practical experiences of nations in all parts of the world this volume provides valuable insights and information to both generalists and specialists interested in how health care will look in the world of the twenty first century

Organisation Development in Health Care 2017-09 this book maps the emergence of health in global development discourse and governance since 1990 it argues that health norms have emerged diffused and subsequently become internalised through the various direct and indirect negotiation processes that created the global development goals covid 19 ebola and hiv aids are prime illustrations of the fact that health is supremely political governments whether they are local national international or multilateral make decisions about their policy responses coordinate their response and channel the necessary resources such decisions are informed by local and global conditions as well as sets of values norms and standards that determine policy and interventions as states and regions become more interconnected the politics of health are increasingly relevant to the sustainable future envisioned by global governance this book explains how considerations of global health have come to inform and infuse the united nations development agenda it identifies processes actors institutions and interactions in global health by analysing two related case studies the millennium development goals and the sustainable development goals providing an overview of and insights about the context of global development thinking and practice the subtleties of global health and global health governance this book is an innovative contribution to the literature it is suitable for students and scholars of global health development studies and international relations

Health Sector Reform in Developing Countries 1995 considers medical technology consensus development programs in canada denmark finland netherlands norway sweden england and the united states
