encyclopedia of gastroenterology second edition provides a comprehensive and concise reference on all aspects of gastroenterology and hepatology including the organs in the gastrointestinal system their functions in health and disease and strategies or procedures to resolve or prevent problems and disease this concise up to date information includes comprehensive sections on the impact of nutrition gastrointestinal microbiota lifestyle commonly used drugs and surgical procedures on health and disease since the first edition attention to the roles of nutrition and gastrointestinal microorganisms microbiota formerly microbiota in health and disease has skyrocketed in addition an entirely new section on obesity and diabetes is included presents comprehensive coverage of every topic within gastroenterology offers researchers a one stop fully referenced resource to explore questions includes teaching tools multimedia and interactive elements provides readers with multi layered content and a media rich learning resource for both instructors and students covers hot new topics in gi health and disease including new sections on stem cells intestinal bacteria obesity and intestinal microbiota

Advancing Smarter and More Secure Industrial Applications Using AI, IoT, and Blockchain

Technology 2021-12-24

there is no doubt that there has been much excitement regarding the pioneering contributions of artificial intelligence ai the internet of things iot and blockchain technologies and tools in visualizing and realizing smarter as well as sophisticated systems and services however researchers are being bombarded with various machine and deep learning algorithms which are categorized as a part and parcel of the enigmatic ai discipline the knowledge discovered gets disseminated to actuators and other concerned systems in order to empower them to

intelligently plan and insightfully execute appropriate tasks with clarity and confidence the iot processes in conjunction with the ai algorithms and blockchain technology are bound to lay out a stimulating foundation for producing and sustaining smarter systems for society advancing smarter and more secure industrial applications using ai iot and blockchain technology articulates and accentuates various ai algorithms fresh innovations in the iot and blockchain spaces the domain of transforming raw data to information and to relevant knowledge is gaining prominence with the availability of data ingestion processing mining analytics algorithms platforms frameworks and other accelerators covering topics such as blockchain applications industry 4 0 and cryptography this book serves as a comprehensive guide for ai researchers faculty members it professionals academicians students researchers and industry professionals

the book 2000 mcqs with explanatory notes for history has been divided into 4 chapters which have been further divided into 31 topics containing 2000 multiple choice questions for quick revision and practice the unique selling proposition of the book is the explanation to each and every question which provides additional info to the students on the subject of the questions and correct reasoning wherever

required the questions have been selected on the basis of the various types of questions being asked in the various exams

1400+ MCQs with Explanatory Notes For GENERAL KNOWLEDGE 2018-03-31

the thoroughly revised updated 2nd edition of the ebook 2100 mcqs with explanatory notes for general science has been divided into 6 chapters which have been further divided into 29 topics containing 2100 multiple choice questions for quick revision and practice the unique selling proposition of the book is the explanation to each and every question which provides additional info to the students on the subject of the questions and correct reasoning wherever required the questions have been selected on the basis of the various types of questions being asked in the various exams

Cutting-Edge Approaches for CNS Protection and Repair: Focus on Vascular and Degenerative Disorders 2021-08-19

hepatobiliary cancer refers to primary malignant tumors originating in cells of the liver bile ducts and gallbladder globally primary liver cancer which includes hepatocellular carcinoma 75 of all cases and intrahepatic biliary cancer or cholangiocarcinoma 10 15 Of all cases is the 6th most commonly diagnosed cancer and 3rd leading cause of cancer deaths worldwide the vast majority of these highly malignant cancers are diagnosed at an advanced stage where treatment options are limited and patient survival outcomes are poor the biological and therapeutic challenges posed by hepatobiliary cancers such as hepatocellular carcinoma hcc and cholangiocarcinoma cca are daunting emphasizing a critical need to review and assess current and evolving basic translational and clinical research focused on addressing the critical obstacles that continue to limit progress towards achieving significant improvements in hcc and cca clinical management and patient

survival outcomes towards this goal this special edition of advances in cancer research is focused on providing a comprehensive timely and authoritative reviews covering such topics of significant scientific and clinical relevance including hepatobiliary cancer risk mechanisms and risk predictive molecular biomarkers causes and functional intricacies of inter and intratumor heterogeneity novel insights into the role of tumor microenvironment and key signaling pathways in promoting hepatobiliary cancer progression therapeutic resistance and immunosuppression emerging biomarkers of hcc and cca prognosis advances in molecular genomics for personalizing tumor classification and targeted therapies innovative preclinical cell culture modeling for hepatobiliary cancer drug discovery and current and emerging trends in hepatobiliary cancer molecular therapeutic targeting and immunotherapies up to date review of hepatobiliary cancers molecular genetics novel predictive molecular biomarkers and distinct mechanisms of inter and intratumor heterogeneity novel insights into the role of tumor microenvironment as a promoter of hepatobiliary cancer progression and therapeutic resistance as well as an emerging therapeutic target current and emerging approaches and strategies for advancing personalized molecular therapeutic targeting and immunotherapy of hepatobiliary cancers

public sector reform in south africa 1994 2021 is an examination of specific public sector reforms in three core public administration areas in the democratic south africa political administrative relationships the delegation of authority to senior managers and performance management

Hepatobiliary Cancers: Translational Advances and Molecular Medicine 2022-08-10

chinese politics are at a crossroads as president xi jinping amasses personal power and tests the constraints of collective leadership in the years since he became general secretary of the chinese communist party in 2012 xi jinping has surprised many people in china and around the world with his bold anti corruption campaign and his aggressive consolidation of power given these new developments we must rethink how we analyze chinese politics an urgent task as china now has more influence on the global economy and regional security than at any other time in modern history chinese politics in the xi jinping era examines how the structure and dynamics of party leadership have evolved since the late 1990s and argues that inner party democracy the concept of collective leadership that emphasizes deal making based on accepted rules and norms may pave the way for greater transformation within china s political system xi s legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world s most populous and increasingly pluralistic country cheng li also addresses the recruitment and composition of the political elite a central concern in chinese politics china analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th central committee including tables and charts detailing their family background education occupation career patterns and mentor patron ties

1300+ MCQs with Explanatory Notes For GENERAL KNOWLEDGE 2nd Edition *2019-04-01*

in this volume the contributing authors from top labs involved in stem cell theranostics share the latest advances in the field of stem cell research the book covers many aspects of stem cell based therapy and the progress made toward stem cell therapy for liver ocular and cardiovascular diseases as well as cancer this volume serves as a continuation of prof khawaja husnain haider s previously edited books pertaining to stem cells based therapnostics this is an ideal book for researchers involved in drug development as well as regenerative medicine and stem cell based therapy the secondary audience includes graduate and postgraduate medical students doctors cellular pharmacology drug industry and researchers involved in using stem cells as ex vivo disease models for drug development

scaffold based cell culture system for cell delivery in experimental animal models and clinical settings besides the use of mesenchymal stem cells the book includes chapters on the use of cardiac progenitor cells cpcs microtissue implantation use of pscs for valvulopathies application of de cellularized organ arrays as natural scaffolds for cardiac tissue engineering use of epicardial stem cells and skeletal myoblasts in cell based therapy for myocardial regeneration besides the cell based therapy approach the book also reviews the stem cell derived exosomes their characteristics and engineering strategies to enhance their therapeutic potential via targeting and drug loading and use in disease models additionally the book also discusses the latest research on injectable hydrogels for cardiovascular regeneration and how hydrogel based delivery protects the cells and their retention post engraftment in the heart a problem which significantly reduces the efficacy of cell based therapy

Governing Law and Dispute Resolution in the Oil and Gas Industry 2021

this book studies relevant actors and practices of conflict intervention by african regional organizations and their intimate connection to space making addressing a major gap regarding what actually happens within and around these organizations based on extensive empirical research it argues that those intervention practices are essentially spatializing practices based on particular spatial imaginations contributing to the continuous construction and formatting of regional spaces as well as to ordering relations between different regional spaces analyzing the field of developing practices of conflict intervention by the economic community of west african states ecowas and the african union au the book contributes a new theory oriented analytical approach to study african regional organizations ros and the complex dynamics of african peace and security based on insights from critical geography as such it helps to close an empirical gap with regard to the internal modes of operation of african ros as well as the lack of their theorization it demonstrates that contrary to most accounts intervention practices of african ros have been diverse and complexly interrelated involving different actors within and around these organizations and

are essentially tied to the space making this book will be of key interest to students and scholars of african politics governance peace and security studies international or regional organizations and more broadly to comparative regionalism international relations and international studies

Indian & World Geography (General Studies Volume-2) 2020-08-21

this book compiles the relevant information related to genome editing tools and their roles in crop improvement the book contains a brief introduction about various genome editing tools and their application in major crops it discusses the genome editing approaches and the strategies used for genome editing in different crops some of the chapters cover the detailed methodology of sgRNA design vector construction and transformation in different crops followed by data analysis a few chapters focus on the applications of genome editing tools towards crop improvement this book will be of particular interest to plant biologists working in the field of genome editing and crop breeders it will provide valuable information and useful material for our readers experimental work

Phylogenomic Approaches to Deal with Particularly Challenging Plant Lineages 2023-07-05

this book constitutes the refereed proceedings of the 15th international colloquium on theoretical aspects of computing ictac 2018 held in Stellenbosch South Africa in October 2018 the 25 revised full papers presented together with two short and two long invited talks were carefully reviewed and selected from 59 submissions the ictac conference aims at bringing together researchers and practitioners from academia industry and government to present research and exchange ideas and experience addressing challenges in both theoretical aspects of computing and the exploitation of theory through methods and tools for system development ictac also specifically aims to

promote research cooperation between developing and industrial countries

Study Material (UPPSC/UPNHM-CHO/AIIMS/BHU/DSSSB) 2022-05-23

this book explores how brics countries respond to and get involved in large scale armed conflict it argues that through responding to armed conflict and deviating from the preferred western foreign policy brics countries are actively involved in building a multi polar and post western world order the author develops a concise typology of response types portraying a nuanced picture of the brics grouping responses reach from non coercive and cooperative multi lateral behaviour reaching to neo imperial unilateralism and military intervention the book explains the selection of response types with reference to six variables which refer to the proximity to war availability of power resources the type of conflict economic interests the brics normative agenda and global humanitarian norms four armed conflicts in libya syria south sudan and the ukraine are chosen to illustrate the brics engagement with large scale armed conflicts

The Emergent African Union Law 2021-02-28

increasing occupational health and safety in workplaces argues for greater reporting of workplace accidents and injuries it also incorporates stress as a factor in rates of accidents and injuries and suggests ways in which workplace safety cultures can be fostered and improved this book will be an invaluable tool for students of management especially those with an interest in small businesses p p1 margin 0 0px 0 0px 0 0px 0 0px font 10 0px arial
