chung lee jeremy punt hugh s pyper cynthia m rogers mark roncace susanne scholz jaqueline s du toit and caroline vander stichele recent scholarship on children's literature displays a wide variety of interests in classic and contemporary children's books while environmental and ecological concerns have led to an interest in ecocriticism as yet there is little on the significance of the ecological imagination and experience to both the authors and readers young and old of these texts this edited collection brings together a set of original international research based chapters to explore the role of children's literature in learning about environments and places with a focus on how children's literature may inform and enrich our imagination experiences and responses to environmental challenges and injustice contributions from australia canada usa and uk explore the diverse ways in which children's literature can provide what are arguably some of the first and possibly most formative engagements that some children might have with nature chapters examine classic and new storybooks mythic tales and image based and or written texts read at home

in school and in the field contributors focus on exploring how children s literature mediates and informs our imagination and understandings of diverse environments and places and how it might open our eyes and lives to other presences understandings and priorities through stories their telling and re telling and their analysis this book was originally published as a special issue of environmental education research from the villainous beast of little red riding hood and the three little pigs to the nurturing wolves of romulus and remus and rudyard kipling s the jungle book the wolf has long been a part of the landscape of children s literature meanwhile since the 1960s and the popularization of scientific research on these animals children s books have begun to feature more nuanced views in picturing the wolf in children s literature mitts smith analyzes visual images of the wolf in children s books published in western europe and north america from 1500 to the present in particular she considers how wolves are depicted in and across particular works the values and attitudes that inform these depictions and how the concept of the wolf has changed over time what she discovers is that illustrations and photos in works for children impart social cultural and scientific information not only about wolves but also about humans and human behavior first encountered in childhood picture books act as a training ground where the young learn both how to decode the symbolic wolf across various contexts and how to make sense of real wolves mitts smith studies sources including myths legends fables folk and fairy tales fractured tales fictional stories and nonfiction highlighting those instances in which images play a major role including illustrated anthologies chapbooks picture books and informational books this book will be of interest to children s literature scholars as well as those interested in the figure of the wolf and how it has been informed over represents the current state of research on picture books and other adjacent hybrid forms of visual verbal texts such as comics graphic novels and book apps with a particular focus on texts produced for and about young people when perry nodelman s words about pictures the narrative art of children s picture books was published almost three decades ago it was greeted as an important contribution to studies in children s picture books and illustration internationally and based substantially on it nodelman has recently been named the 2015 recipient of the international grimm award for children s literature criticism in the years since words about pictures appeared scholars have built on nodelman s groundbreaking text and have developed a range of other approaches both to picture books and to newer forms of visual verbal texts that have entered the marketplace and become popular with young people the essays in this book offer more words about established and emerging forms of picture books providing an overview of the current state of studies in visual verbal texts and gathering in one place the work being produced at various locations and across disciplines essays exploring areas such as semiological and structural aspects of conventional picture books graphic narratives and new media forms and the material and performative cultures of picture books represent current work not only from literary studies but also media studies art history ecology middle eastern studies library and information studies and educational research in addition to work by international scholars including william moebius erica hateley nathalie op de beeck and nina christensen that carries on and challenges the conclusions of words about pictures the collection also includes a wide ranging reflection by perry nodelman on continuities and changes in the current interdisciplinary field of study of visual verbal texts for young readers providing a look back over the history of picture books and the development of picture book scholarship more words about pictures also offers an overview of our current understanding of these intriguing texts this widely adopted text synthesizes an extensive body of research on asian american personality development identity and mental health uba focuses on how ethnocultural factors interact with minority group status to shape the experiences of members of diverse asian american groups cultural values and norms shared by many asian americans are examined and common sources of stress described including racial discrimination and immigrant and refugee experiences rates of mental health problems in asian american communities are reviewed as are predictors and manifestations of specific disorders the volume also explores patterns in usage of available mental health services and considers ways that service delivery models might be adapted to better meet the needs of asian american clients although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students few textbooks currently exist that actually do this child development an active learning approach includes the following key features challenging misconceptions true false or multiple choice tests are incorporated at the beginning of each chapter to specifically address topics that are sources of relationship between self esteem and student achievement is analyzed in this book as welfare states grow up they begin to think more carefully about their future jane lewis is showing them how best to do so this stellar collection of articles by top european scholars combines creative thinking about the new social investment state with impressive empirical research on specific forms of public support for family work nancy folbre university of massachusetts amherst us the nature of the relationship between children parents and the state has been central to the growth of the modern welfare state and has long been a problem for western liberal democracies welfare states have undergone profound restructuring over the past two decades and families also have changed in terms of their form and the nature of the contributions that men and women make to them more attention is being paid to children by policymakers but often because of their importance as future citizen workers the book explores the implications of changes to the welfare state for children in a range of countries children changing families and welfare states examines the implications of social policies for children sets the discussion in the broader context of both family change and welfare state change exploring the nature of the policy debate that has allowed the welfare of the child to come to the fore tackles policies to do with both the care and financial support of children looks at the household level and how children fare when both adult men and women must seek to combine paid and unpaid work and what support is offered by welfare states endeavours to provide a comparative perspective on these issues the contributors have written a book that will be warmly welcomed by scholars and researchers of social policy social work and sociology and students at both the advanced undergraduate and post graduate level 1949 this volume includes the papers presented during the 1st euro mediterranean conference for environmental integration emcei which was held in sousse tunisia in november 2017 this conference was jointly organized by the editorial office of the euro mediterranean journal for environmental integration in sfax tunisia and springer mena publishing program in germany it aimed to give a more concrete expression to the euro mediterranean integration process by supplementing existing north south programs and agreements with a new multilateral scientific forum that emphasizes in particular the vulnerability and proactive remediation of the euro mediterranean region from an environmental point of view this volume gives a general and brief overview on current research focusing on emerging environmental issues and challenges and its applications to a variety of problems in the euro mediterranean zone and surrounding regions it contains over five hundred and eighty carefully refereed short contributions to the conference topics covered include 1 innovative approaches and methods for environmental sustainability 2 environmental risk assessment bioremediation ecotoxicology and environmental safety 3 water resources assessment planning protection and management 4 environmental engineering and management 5 natural resources characterization assessment management and valorization 6 intelligent techniques in renewable energy biomass wind waste solar 7 sustainable management of marine environment and coastal areas 8 remote sensing and gis for geo environmental investigations 9 environmental impacts of geo natural hazards earthquakes landslides volcanic and marine hazards and 10 the environmental health science natural and social impacts on human health presenting a wide range of topics and new results this edited volume will appeal to anyone working in the subject area including researchers and students interested to learn more about new advances in environmental research initiatives in view of the ever growing environmental degradation in the euro mediterranean region which has turned environmental and resource protection into an increasingly important issue hampering sustainable development and social welfare this book constitutes the first time in the field of developmental psychology that cross cultural roots of minority child development have been studied in their ancestral societies in a systematic way and by an international group of researchers most child development and child psychology texts take cultural diversity in development into account only as an addendum or as a special case it is not integrated into a comprehensive theory or model of development the purpose of this text is to redress this situation by enlisting insiders and outsiders perspectives on socialization and development in a diverse sampling of the world s cultures including developing regions that often lack the means to speak for themselves in the arena of international social science the unique feature of this text is the paradigm for the minority groups represented the questions focused on how development was behaviorally expressed within the culture of origin and in new societal contexts thus developmental issues such as language and mother child interactions for african american children are considered in the united states as well as in the african culture of origin and in france as a country of immigration this paradigm is considered for african and asian cultures and the americas including hispanics from mexico as well as native americans specific questions posed consider the extent to which the development and socialization of minority children can be seen as continuous with their ancestral cultures the cultural and political conditions in the united states canada and france have modified developmental and socialization processes yielding discontinuities with ancestral cultures the ancestral cultures have changed yielding cross generational discontinuities in the development and socialization of immigrants from the very same countries the role of interdependence and independence in developmental scripts can account for historical continuities and discontinuities in development and socialization both across and within cultures these questions not only provide the unifying theme of this unique book but also a model for conceptualizing multi culturalism within a unified framework for developmental psychology this book examines the modern pandemic of online child sexual exploitation ocse it explores the prevalence perpetration impact and victimization of as well as therapy for child sexual exploitation and its interaction with child sexual abuse chapters discuss ocse from neuropsychological epidemiological neurological behavioral psychological clinical neurobiological and epigenetic perspectives the volume also addresses the physical and mental impact of early exposure to pornography the book serves as a resource on an issue that is proving exponentially complex as technology ceaselessly evolves at a faster rate than its consequences can be understood and addressed key areas of coverage include neuropsychological changes and dysfunctional coping mechanisms resulting from both online and offline child sexual abuse the psychological emotional and physical impacts e g

depression anxiety ptsd and self harm of child sexual abuse prevention and early intervention strategies including scalable technological responses developing a public health approach to preventing and addressing online child abuse and exploitation porn culture and its impact on children adolescents and emerging adults the neurobiology and epigenetic impact of trauma this book is a must have resource for researchers clinicians and graduate students in child and school psychology public health social work as well as interrelated disciplines including neuropsychology neurobiology sociology anthropology and educational policy and politics this book is a comparative study of family change parental employment and social policy in the five nordic countries the netherlands germany and the united kingdom in all these countries family forms have been profoundly affected by lower fertility rates lower marriage rates increased cohabitation higher risks of relationship breakdown and episodes of lone parenthood these changes have also been linked to an increase in the proportion of mothers participating in the labour market the western has always been inextricably linked to the usa and studies have continually sought to connect its historical development to changes in american society and hollywood innovations focusing new critical attention on films produced in germany italy and britain this timely book offers a radical rereading of the evolutionary history of the western and brings a vital international dimension to its study lee broughton argues not only that european films possess a special significance in terms of the genre s global development but also that many offered groundbreaking and progressive representations of traditional wild west others native americans african americans and so called strong women european westerns investigates how the histories of germany italy and britain and the idiosyncrasies of their respective national film industries influenced representations of the self and other shedding light on the broader cultural historical and political contexts that shaped european engagement with the genre euro librarianship focuses on strategies for working toward cooperation between libraries throughout europe and the united states to provide the best access and information to research materials as possible chapters by several authors in their original languages with english abstracts give this book a unique international appeal common difficulties such as fiscal constraints and rising book and serial prices are discussed stressing enhanced communication and shared responsibilities this new volume helps bring libraries of all countries closer to the resource sharing capabilities that allowa scholars and researchers much wider access to information than is available today in this timely new book many of the papers that were presented at the second western european specialists wess international conference are brought together to be read and studied by everyone the first part of the project resulted in a book entitled missing and sexually exploited children in the eu epidemiological data the book stresses the importance of eu wide multidisciplinary and integrated efforts between competent authorities and civil society organisations in collecting epidemiological data as a basis for improved knowledge based policy making in the area of missing and sexually exploited minors it comprises country reports of all 15 eu member states each country report provides essential definitional information regarding the various forms of sexual exploitation of children and types of missing children outlines the way data collection on sexual exploited and missing children by various governmental police judicial other and non governmental actors is organised and deliver available data on the phenomena concerned a final comparative report bridges the country report information into a first union wide epidemiological state of the art thus showing that current data collection is organised in a very chaotic and poor fashion at the same time the report identifies the main weaknesses and shortcomings of applied data collection methods it also offers a set of recommendations for both member state and eu action in striving for improved and integrated ways of collecting administering and centralising reliable comparable and comprehensive data on the various forms of missing and sexually exploited children european national football came together in the summer of 2012 for the 14th occasion this book sets out to examine the enduring social tensions between supporters and authorities as well as those between local national and european identities which formed the backdrop to the 14th staging of the european national football tournament euro2012 the context of the tournament was somewhat unique from those staged in previous years being jointly hosted for the first time by two post communist nations still in the process of social and economic transition in this respect the decision to stage euro 2012 in poland and ukraine bore its own material and symbolic legacies shaping the tournament the unsettling of neo liberal imaginings and emergent east west fears about poor infrastructure inefficiencies and corruption jostled with moral panics about racism and fears surrounding the potentially unfulfilled consumerist expectations of west european supporters the book seeks to explore the ideologies and practices invoked by competing national sentiments and examine the social tensions ambiguities and social capital generating potentials surrounding national ethnic european identity with respect to national football teams supporters and supporter movements this book was published as a special issue of soccer and society over the past decade european football has seen tremendous changes impacting upon its international framework as well as local traditions and national institutions processes of europeanization in the fields of economy and politics provided the background for transformations of the production and consumption of football on a transnational scale in the course of such rearrangements football tournaments like the uefa championship or the european champions league turned into mega events and media spectacles attracting ever growing audiences the experience of participating in these events offers some of the very few occasions for the display and embodiment of identities within a european context this volume takes the 2008 euros hosted by austria and switzerland as a case study to analyze the political and cultural significance of the tournament from a multidisciplinary angle what are the special features and spatial arrangements of a uefaesque europe in comparison to alternative possibilities of a europe situating the sport tournament between interpretations of collective european ritual and european spectacle the key research question will ask what kind of europe was represented in the cultural political and economic manifestations of the 2008 euros this book was published as a special issue of soccer and society the first book on foster care written from foster mothers perspectives they re all my children voices the often painful experiences of contemporary u s foster mothers as they struggle to mother and care work in the face of exploitative social relations with the state drawing on extensive ethnographic research wozniak herself a former foster mother and an anthropologist presents and analyzes women s personal stories about fostering to reflect on the larger socio cultural context of american family lifenamely how we think about kinship identity and work foster mothers construct enduring kinship relationships with children and often with the children s biological families these relationships enhance children s chances to growth and thrive and in turn extend women s kin relationships into often distant and disparate communities wozniak also highlights the economic side of fostering to show how foster mothers are both mothers and workers foster children are both providers and provided for adored sentimental children and economic figures through in depth interviews and participant observation wozniak argues that we have not gone far enough in understanding the experiences of these women whose life work lies outside the usual boundaries nor have child welfare gone far enough in revising the theories upon which child welfare

The Rights of the Child and the Changing Image of Childhood 2017-12-12 this book constitutes the first time in the field of developmental psychology that cross cultural roots of minority child development have been studied in their ancestral societies in a systematic way and by an international group of researchers most child development and child psychology texts take cultural diversity in development into account only as an addendum or as a special case it is not integrated into a comprehensive theory or model of development the purpose of this text is to redress this situation by enlisting insiders and outsiders perspectives on socialization and development in a diverse sampling of the world s cultures including developing regions that often lack the means to speak for themselves in the arena of international social science the unique feature of this text is the paradigm for the minority groups represented the questions focused on how development was behaviorally expressed within the culture of origin and in new societal contexts thus developmental issues such as language and mother child interactions for african american children are considered in the united states as well as in the african culture of origin and in france as a country of immigration this paradigm is considered for african and asian cultures and the americas including hispanics from mexico as

well as native americans specific questions posed consider the extent to which the development and socialization of minority children can be seen as continuous with their ancestral cultures the cultural and political conditions in the united states canada and france have modified developmental and socialization processes yielding discontinuities with ancestral cultures the ancestral cultures have changed yielding cross generational discontinuities in the development and socialization of immigrants from the very same countries the role of interdependence and independence in developmental scripts can account for historical continuities and discontinuities in development and socialization both across and within cultures these questions not only provide the unifying theme of this unique book but also a model for conceptualizing multi culturalism within a unified framework for developmental psychology
