German Infantryman vs Soviet Rifleman 2014-07-20 the axis invasion of the soviet union on 22 june 1941 pitted nazi germany and her allies against stalin s forces in a mighty struggle for survival fighting alongside the spearhead panzer divisions were germany s highly skilled

and veteran motorized infantrymen including the German Army's premier unit, the Panzer Lehr, opposing these German mobile forces. The Soviets deployed the often ill-trained and poorly equipped men of the rifle regiments who fought tenaciously and with the threat of savage reprisals from their own side. In this book, three bruising clashes during the first seven weeks of the campaign are assessed: a bloody encounter at Zhlobin, the struggle for the destroyed city of Smolensk, and then a prolonged clash along a dangerously stretched German defensive perimeter at Vaskovo-Voroshilovo.

US Marine vs NVA Soldier 2015-08-20 In 1967-68, the United States Marine Corps (USMC) was on the front line of the defence of South Vietnam's Quang Tri province, which was at the very heart of the Vietnam conflict. Facing them were the soldiers of the North Vietnamese Army (NVA), men whose organization and equipment made them a very different opponent from the famous irregular Viet Cong forces. From the hill battles in April 1967 to the struggle for the city of Hue in January-March 1968, this bloody campaign forced the two sides into a gruelling trial of strength. The USMC held a general technological and logistical advantage, including close air support and airborne transport technology and supplies, but could not always utilize these resources effectively in mountainous jungle or urban environments better known by their Vietnamese opponents. In this arresting account of small-unit combat, David R. Higgins steps into the tropical terrain of Vietnam to assess the performance and experience of USMC and NVA forces in three savage battles that stretched both sides to the limit.

The Vauban Fortifications of France 2013-01-20 Vauban was the foremost military engineer of France, not only during his lifetime but also throughout the 18th century, when his legacy and methods remained in place almost unchanged. Indeed, his expertise and experience in the construction, defence, and attack of fortresses is unrivalled by any of his contemporaries of any nationality in all three of those fields. He was a significant innovator and prolific exponent, having planned approximately 160 major defensive projects and directed over 50 sieges. This book provides not only a modern listing of his varied interventions and their fates but also a wide-ranging discussion of just how and why they pushed forward the international boundaries of the arts of fortification.

Fortifications of the Incas 2012-06-20 The greatest period of Inca expansion occurred during the reigns of Pachacuti (1438-71) and Tupac Inca (1471-93). From the mountain stronghold of Cuzco, they subjugated the surrounding kingdoms and territories, absorbing their civilizations and their peoples. By 1525, they dominated much of the west of the continent, relying on fortified strongholds, an extensive system of roads and bridges, and obligatory military service to control local populations. This title takes a detailed look at the development of Incan fortification techniques and examines how they came to be overrun by the Spanish conquistadors.

It failed to save France from crushing defeat in 1940, yet there are those who argue that it accomplished exactly what it was designed to do. This book provides a concise and informative treatment of the Maginot Line from north-east France to the Mediterranean, packed with plans, contemporary and modern images, plus digital artwork. It presents a detailed visual exploration of this famous fortification system.

Medieval Russian Fortresses AD 862-1480 2012-06-20 According to Russian legend, in the year AD 862, the Slav tribes of what is now European Russia invited a number of Scandinavian princes to rule over them. However, on the death of these princes, Prince Oleg seized Kiev and united the northern and southern Russian territories, building extensive fortifications to protect its borders. The rise of feudalism in the 11th century led to the development of individual fortified sites, and the extended border defences fell into disrepair. Consequently, Mongol hordes poured over the border, introducing the siege warfare techniques of the East, heavily influencing the fortification styles thereafter. Using a wealth of archaeological evidence and first-hand sources, Konstantin Nossov charts the history of the medieval Russian fortress from its early beginnings until the 14th century, paying special attention to the development of one of the most iconic fortifications in the world, the Kremlin.

Finnish Soldier vs Soviet Soldier 2016-10-20 The Winter War was supposed to be a quick and easy conflict; instead, it proved to be a bitter war that destroyed the international reputation of the Soviet Red Army. The diminutive Finnish force was desperately outnumbered by almost half a million Russian troops, but rather than sweeping across their neighbours, the Soviet troops stumbled blindly, constantly wrong-footed, and then bloodied by their seemingly insignificant foe. Drawing on a wide range of sources, this study looks at three key battles, drawing a stark contrast between the poorly prepared Russian troops and the Finns, who made excellent use of terrain and innovative guerrilla tactics. As they defended their homeland, detailed maps and specially commissioned artwork highlight key moments in the Winter War, a David and Goliath conflict that saw the Soviet Union suffer horrendous losses as they tried to recover from each disastrous defeat.
