gpu based acceleration of the rao optimization algorithms

Feb 26 2023

in this paper parallel gpu based versions of the three rao metaphor less optimization algorithms are proposed and used to solve large scale nonlinear equation systems which are hard to solve with traditional numerical methods particularly as the size of the systems get bigger

rao algorithms for multi objective optimization of selected

Jan 28 2023

in simultaneous optimization of thermal efficiency and thermo economic function the rao 3 solution has a higher value for thermal efficiency and the rao 1 solution has a higher value for the thermo economic function

engineering optimization theory and practice semantic scholar

Dec 27 2022

the work s motivation is to introduce a bounded solution approach for the gpp while considering the variation among the right hand side parameters and the proposed method uses the two level mathematical programming problems and obtains the solution of the objective function in a specified interval expand

energies free full text a robust optimization approach

Nov 25 2022

this paper offers three easy to use metaphor less optimization algorithms proposed by rao to solve the optimal power flow opf problem rao algorithms are parameter less optimization algorithms as a result algorithm specific parameter tuning is not required at all

remedial actions optimisation interface farao

Oct 25 2022

farao provides a common interface for remedial actions optimisation features this

way it may be possible to use transparently multiple implementation of rao functionality without changing the client code current version of this interface is in alpha version
