peter f drucker argues that what underlies the current malaise of so many large and successful organizations worldwide is that their theory of the business no longer works the story is a familiar one a company that was a superstar only yesterday finds itself stagnating and frustrated in trouble and often in a seemingly unmanageable crisis the root cause of nearly every one of these crises is not that things are being done poorly it is not even that the wrong things are being done indeed in most cases the right things are being done but fruitlessly what accounts for this apparent paradox the assumptions on which the organization has been built and is being run no longer fit reality these are the assumptions that shape any organization's behavior dictate its decisions about what to do and what not to do and define what an organization considers meaningful results these assumptions are what drucker calls a company's theory of the business the harvard business review classics series offers you the opportunity to make seminal harvard business review articles a part of your permanent management library each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world and will have a direct impact

on you today and for years to come

even in the flattest landscape there are passes where the road first climbs to a peak and then descends into a new valley most of these passes are simply topography with little or no difference in climate language or culture between the valleys on either side but some passes are different they are true divides history too knows such divides once these divides have been crossed the social and political landscape changes the social and political climate is different and so is the social and political language some time between 1965 and 1973 we

passed over such a divide and entered the next century challenging insightful and provocative peter drucker s the new realities anticipates the central issues of a rapidly changing world when it was initially published in 1989 some reviewers mistakenly thought the new realities was a book about the future or in other words a series of predictions but as indicated in the title the book discusses realities drucker argues that events of the next thirty to forty years or even further on had already largely been defined by events of the previous half century thus drucker discusses episodes in world history that had not yet happened at the time of the book s initial publication such as the archaism of the hope for salvation by society in the end of fdr s america the democratization of the soviet union in when the russian empire is gone the technology boom of the 1990s in the information based organization and the evolution of management in management as social function and liberal art graced with a new preface by the author that discusses both reactions to the original publication of the book and how important it is for decision makers to consider the past and present when planning for the future the new realities is mandatory reading for understanding politics government the economy information technology and business in an ever changing world
