~~agromyzidae diptera of economic importance by kenneth a
spencer 1973 junk edition in english economic importance the~~
diptera probably have a greater economic impact on humans
than any other group of insects some flies are pests of
agricultural plants others transmit diseases to humans and
domestic animals agromyzidae diptera is a family with many
species of economic importance on agricultural plants however
many species are attacked by hymenopteran parasitoids which
are known to be habitat rather than species specific several
families of diptera are of major economic importance and
involved in the transmission of more disease pathogens to
humans and other animals than any other group of arthropods
agromyzidae diptera of economic importance k a spencer
springer netherlands dec 30 2010 science 418 pages the
original stimulus which started kenneth spencer on a study of
the agro diptera flies are the most ecologically diverse
group of insects and probably have a greater economic impact
on humans than any other group of insects 4 5 several
families of diptera are involved in the transmission of
disease pathogens to humans and other animals an economic
school of thought common in the 17th and 18th centuries which
argued that countries should focus on building up their
supplies of gold and silver this required nations to restrict
in the department of economics students utilize statistical
mathematical institutional and historical approaches to
ascertain and analyze economics in various areas such as
public finance banking and finance industries labor and the
international economy in this study the mitogenome of
vibrissina turrita meigen 1824 diptera tachinidae was
sequenced based on the next generation sequencing approach
and analyzed here for the first time the 17 387 bp genome has
a high a t content and consists of 13 protein coding genes 22
transfer rna genes two ribosomal rna genes and one noncoding
