depth their intricacies and their central role in daily life few people who are not economists or traders know how commodity markets work almost every day newspaper headlines and media commentators scream warnings of impending doom shortages of arable land clashes over water and political conflict as global demand for fossil fuels outstrips supply the picture is bleak but our grasp of the details and the macro shifts in commodities markets remain blurry winner take all is about the commodity dynamics that the world will face over the next several decades in particular it is about the implications of china s rush for resources across all regions of the world the scale of china s resource campaign for hard commodities metals and minerals and soft commodities timber and food is among the largest in history to be sure china is not the first country to launch a global crusade to secure resources from britain s transcontinental operations dating back to the end of the 16th century to the rise of modern european and american transnational corporations between the mid 1860 s and 1870 s the industrial revolution that powered these economies created a voracious demand for raw materials and created the need to go far beyond their native countries so too is china s resource rush today although still in its early stages already the breadth of china s operation is awesome and seemingly unstoppable china s global charge for commodities is a story of china s quest to secure its claims on resource assets and to guarantee the flow of inputs needed to continue to drive economic development moyo an expert in global commodities markets explains the implications of china s resource grab in a world of diminishing resources this book analyses the technology development efforts of korea s electronics industry the country s largest exporter it asks how the korean electronics industry was able to develop both in terms of production and technology despite low inflows of licensing and foreign direct investments the books argues that the key to its spectacular growth has been through its participation and learning from an inter firm arrangement called original equipment manufacturing arrangement oem a number of firm level case studies on the korean electronics industry support this argument the role of the government especially related to its technology policy has also been analysed the government was effective in providing financial incentives for the firms technological upgrading efforts but its supplying of direct technological assistance had limited success overall this book argues that contrary to many previous studies the role of multinational enterprises has been significant in the development of korea s electronics industry and that they have acted productivity sectors is increasingly perceived as inextricably linked with the sustainable development agenda in the pursuit of structural change policymakers have pinned their hopes on targeted policy tools such as special economic zones sezs these geographically demarcated spaces designed to attract investment with a wide set of advantages have become de rigueur however a systematic evaluation of evidence informed policymaking is scarce due to conceptual and practical challenges this book fills that gap and shows that sezs are no shortcut to economic development their success in driving economic transformation depends on the complex interplay of sociopolitical economic and strategic factors this book contributes to the burgeoning literature on sezs by providing the first systematic evaluation of the sez policy it adopts the policy cycle approach to organise policy evaluation into three hierarchical layers input evaluation agenda building output evaluation policy designs and outcome evaluation immediate effects of sezs on firms behaviour and performance with special reference to south asian countries the strategy is to bring together the findings of microeconomic evaluations to draw macro inferences on the contribution of sezs to the broader objectives of structural transformation and competitiveness part i of the book delves into development challenges facing the region lays out theoretical foundations underlying the relevance of sezs in addressing them and examines the relevance of sezs in the context of south asia part ii evaluates the policy first at systemic level to gauge whether and how the policy is rooted in broader development goals and then at the design level to examine the fit between the policy goals and designs part iii presents a counterfactual evaluation of the impact of sezs
