The story of how the map of New Zealand emerged is a fascinating one. The first full map of the continent was published in London in 1773, which might seem the natural starting point, but over the preceding 150 years, fragments of charts and intelligence about New Zealand ricocheted around various parts of the world in a draught of the South Land. Paul Moon

provides the first comprehensive account of this piecemeal process moon s investigation covers several continents over more than a century and reveals the personalities blunders strategic miscalculations scientific brilliance and imperial power plays that were involved above all he examines the roles played by explorers and traders m ori and european rulers scientific societies and military groups as well as specialist cartographers and publishers at a time when maps as colonial tools enablers of trade and objects of curiosity are being studied anew his careful analysis and engaging narrative will be of interest to scholars everywhere

many readers of the bible believe that interpreting the scriptures well simply involves a two way dialogue between themselves and the text implied in this view is the idea that we can simply jump over two thousand years of biblical interpretation however if we believe that god has been speaking through the bible to devout believers throughout history it would seem that we should find a way to identify the insights they perceived in the text so that we can learn to read these sacred texts with them drawing on resources from reception theory the goal of reading the bible with the giants is to enable the contemporary reader to interpret the bible in dialogue with those who have gone before us

the philosophical and theological study of aesthetics has a long and rich history stretching back to platos identification of ultimate goodness and beauty together representing the eternal form recent trends in aesthetic theory however characterised by a focus on the beautiful at the expense of the good have made it an object of suspicion in the orthodox church in its place greek theologians have sought to emphasise philokalia as a truer theological discipline seeking to reverse this trend chrysostomos stamoulis brings into conversation a plethora of voices from church fathers to contemporary poets and from a marxist political theorist to a literary critic out of this dialogue stamoulis builds a model for the re appropriation of orthodoxys patristic and byzantine past that is no longer defined in antithesis to the western present the openness he proposes allows us to perceive afresh the world shot through with divinity if only we can lift our gaze to see it

dismantling the false dichotomy philokalia or aesthetics is the first step
