Comprehensive Evidence Based Interventions for Children and Adolescents 2014-06-18

a complete guide to evidence based interventions for children and adolescents the past decade has witnessed the development of numerous interventions proved to be highly effective several treatments are now considered to be well established or probably efficacious interventions for children given the range of providers working with children clinical psychologists child psychiatrists clinical social workers school psychologists and marriage and family therapists this book is designed to provide all professionals the information they now need about the use of these evidence based interventions ebis as well as the evaluation criteria used to determine their efficacy in meeting the mental health needs of children alfano and beidel have assembled a team of experts to write the disorder chapters each chapter begins with an overview of the disorder then delves into evidence based approaches to treatment the impact of parental involvement case by case modifications progress measurement and clinical examples in overview chapters the editors cover the role of development in treatment planning and implementation dissemination of ebis into school and community settings the use of controversial therapies with children emerging methods of service delivery and access improvement comprehensive evidence based interventions for children and adolescents provides clinicians researchers and students alike with the theoretical conceptual and practical skills to provide children and adolescents with the best care possible

Keeping track of time 2019-11-19

the overall aim of this thesis was to investigate daily time management dtm and time related interventions aiming to enhance participation in everyday activities among school age children and young adults with neurodevelopmental disorders in study i experiences of participation when using time assistive devices tads in daily activities were investigated from the perspective of young adults aged 17 37 with intellectual disabilities id n 9 using semi structured interviews in studies ii and iv a new multimodal time related intervention consisting of psychoeducation compensation with tads and time skills training was investigated in children aged 9 15 with attention deficit hyperactivity disorder adhd study ii was a randomized controlled trial rct with an intervention group n 19 and a control group n 19 the aim of study iii was to describe dtm time processing ability tpa and self rated autonomy in children aged 9 15 with adhd n 47 compared to children with id n 47 and typically developing td children n 47 in study iv occupational performance and satisfaction were evaluated n 27 in studies ii iii and iv a source for data collection included assessment proxy report and self reports using tads study i increased participation in activities in all areas of daily life self care activities at work or school and leisure time activities a feeling of having more control led to health benefits participants described participation

restrictions related to attitudes from their social network towards participation and attitudes towards the use of tads from the individuals themselves study ii showed that the children in the intervention group increased their tpa significantly more compared to the control group mostly in terms of time orientation the parents in the intervention group rated their children s dtm as significantly more improved compared to the parents of the children in the control group however according to the children themselves there was no statistically significant improvement in their dtm the psychoeducation for parents and school staff did not increase children s tpa and dtm on its own the majority of parents and children study iv rated the children s occupational performance and satisfaction significantly higher at follow up than at baseline in general children rated their occupational performance and satisfaction higher than their parents did most goals decided by the children and their parents involved daily routines and time orientation study iii showed that children with adhd and children with id had significantly lower tpa dtm and autonomy compared to td children children with adhd showed higher levels of self rated autonomy compared to children with id but the reverse was found in dtm however there was significant diversity among children with adhd and children with id which was not explained by age some children had difficulties at every level of tpa while others were skilled at every level the level of self rated autonomy followed the level of tpa in conclusion this thesis revealed that children with adhd and id have the same overall pattern of tpa but may have a delayed tpa which affects their dtm and autonomy and thereby also influences their participation in daily activities the results show that a multimodal time related intervention using tads and time skills training could increase tpa and dtm in children with adhd aged 9 15 years with time deficits experiences from young adults with id also show increased participation in daily activities and health benefits using tads it is recommended that tpa and dtm should be measured to identify difficulties in tpa and dtm in children with adhd and to offer tailored time related interventions in addition to medication

Emotional and Behavioral Problems of Young Children, Second Edition

2017-02-20

this book is intended to provide child focused mental health providers with information on how to address common emotional and behavioral problems exhibited by preschool and kindergarten age children our main focus is to provide practical and effective interventions that can easily be implemented by clinicians working in educational settings as well as by clinical psychologists and other mental health providers working with children in nonschool settings in addition we emphasize working with parents of young children who are exhibiting behaviors of concern

Oxford Guide to Brief and Low Intensity Interventions for Children and Young People 2022-07-18

many children with mental health problems do not receive support and there are often extensive waiting lists for children and young people's mental health services which are increasingly overstretched unfortunately a large proportion of children with mental health disorders do not access evidence based treatment low intensity psychological interventions are now recommended by a number of national guidelines and in the uk are being implemented by a new workforce of child wellbeing practitioners cwps the oxford guide to brief and low intensity interventions for children and young people provides a comprehensive resource for therapists services and training providers regarding the use delivery and implementation of brief and low intensity psychological interventions within a child and adolescent context it includes concise focused chapters from leading experts in the field combining the most up to date research with practical considerations regarding the delivery of low intensity interventions the first of its kind this book will be an indispensable resource for practitioners services and training courses internationally

Educating Children with Autism 2001-11-11

autism is a word most of us are familiar with but do we really know what it means children with autism are challenged by the most essential human behaviors they have difficulty interacting with other people often failing to see people as people rather than simply objects in their environment they cannot easily communicate ideas and feelings have great trouble imagining what others think or feel and in some cases spend their lives speechless they frequently find it hard to make friends or even bond with family members their behavior can seem bizarre education is the primary form of treatment for this mysterious condition this means that we place important responsibilities on schools teachers and children's parents as well as the other professionals who work with children with autism with the passage of the individuals with disabilities education act of 1975 we accepted responsibility for educating children who face special challenges like autism while we have since amassed a substantial body of research researchers have not adequately communicated with one another and their findings have not been integrated into a proven curriculum educating children with autism outlines an interdisciplinary approach to education for children with autism the committee explores what makes education effective for the child with autism and identifies specific characteristics of programs that work recommendations are offered for choosing educational content and strategies introducing interaction with other children and other key areas this book examines some fundamental issues including how children's specific diagnoses should affect educational assessment and planning how we can support the families of children with autism features of effective instructional and

comprehensive programs and strategies how we can better prepare teachers school staffs professionals and parents to educate children with autism what policies at the federal state and local levels will best ensure appropriate education examining strategies and resources needed to address the rights of children with autism to appropriate education children with autism present educators with one of their most difficult challenges through a comprehensive examination of the scientific knowledge underlying educational practices programs and strategies educating children with autism presents valuable information for parents administrators advocates researchers and policy makers

Disadvantaged Childhoods and Humanitarian Intervention 2019-02-07

this book explores how humanitarian interventions for children in difficult circumstances engage in affective commodification of disadvantaged childhoods the chapters consider how transnational charitable industries are created and mobilized around childhood need highlighting children in situations of war and poverty and with indeterminate access to health and education to redirect global resource flows and sentiments in order to address concerns of child suffering the authors discuss examples from around the world to show how as much as these processes can help achieve the goals of aid organizations such practices can also perpetuate the conditions that organizations seek to alleviate and thereby endanger the very children they intend to help

Play Therapy Interventions with Children's Problems 2005

this book presents recent positive psychological research applications and interventions being used among adolescents and children currently there is a wave of change occurring whereby educators and others working with children and adolescents are beginning to recognize the benefits of looking at well being from a positive perspective specifically the integration of positive psychological theory into the school curriculum in order to improve student well being moreover although the positive psychological field has grown tremendously since its inception there remains an imbalance in the publication of research findings applications and interventions among children and adolescents in comparison to adults this book fills the need for a reference to this valuable information and benefits a wide range of professionals including educators clinicians psychologists students and many other working with children and adolescents

Research, Applications, and Interventions for Children and Adolescents

2013-05-13

researchers increasingly recognize the importance of early family experiences on children and the impact that inter parental conflict has on child development this book reviews recent research in order to show how children who experience high levels of inter parental conflict are put at both an immediate psychological and physical risk and a longer developing risk of recapitulating such behaviors the authors examine topics such as the differences between destructive and constructive inter parental conflict on child development why some children are more adversely affected than others and how conflict affects child physiology ultimately they provide suggestions for improving the futures of children who are experiencing challenging family environments today

Parental Conflict 2014-01-01

this indispensable book provides hands on tools and resources for addressing common emotional and behavioral problems in preschool and kindergarten age children the focus is on evidence based interventions that are practical and effective and that help prevent the development of more serious difficulties later on the clinician is taken step by step through managing everything from toileting eating and sleep problems to externalizing disorders internalizing disorders and the effects of physical or sexual abuse a variety of assessment methods are demonstrated and guidelines provided for planning and implementing a range of home and school based interventions conveniently designed in a large size format for ease of photocopying the volume contains over 30 reproducible parent handouts and other clinical tools key features early diagnosis and treatment are essential for success in later years includes practical interventions for use with parents many reproducible handouts and tools are provided photocopy rights the publisher grants individual book purchasers nonassignable permission to reproduce selected materials in this book for professional use for details and limitations see copyright page

Emotional and Behavioral Problems of Young Children 2003-03-28

preschool children have been largely neglected in the mental health treatment literature although research has established that many behavioral and emotional disorders in children result from events occurring during the preschool years or are first manifested during this period this has occurred for several reasons traditional psychoanalytic thinking has considered preschoolers to be too psychologically immature for complete manifestations of psychopathology and the limited language abilities of young children have complicated assessment procedures and made them less appropriate for treatment approaches that are largely verbal in nature in addition the developmental complexity of the preschool period has deterred many researchers from investigating clinical issues

with this age group partly as a result of the lack of information on preschoolers in the literature practitioners have historically been uncomfortable in conducting assessments and initiating treatment with young children they have often adopted a wait and see attitude in which formal mental health diagnosis and treatment are not implemented until after the child's entry into school unfortunately such a delay may mean wasting the time during which mental health interventions can be maximally effective recently this attitude has changed and practitioners now recognize the need for assessment and treatment of behavioral and emotional disorders early in life what they require to assist them in the timely delivery of such services is information about assessment and treatment procedures specifically designed for preschoolers and with demonstrated efficacy with that age group

Mental Health Interventions with Preschool Children 2013-11-11

handbook for school psychologists on research based resources for working with children in the schools

Children's Needs III 2006

in response to the increasing appreciation of groups for prevention and intervention this handbook provides school and community mental health care professionals with a valuable resource for developing competence in group work this title provides the latest information on specific disorders and psychological issues that children and families face

Handbook of Group Intervention for Children and Families 1998

why are some children abused or neglected what can be done to protect and help them a key element of informed decision making is knowing what sort of problems are amenable to what sort of intervention in what circumstances and with what degree of certainty effective interventions for child abuse and neglect provides a thorough and detailed review of the available research and makes suggestions as to how this evidence can be incorporated into professional child protection work geraldine macdonald first considers the range of evaluative tools available with illustrations from existing research studies and reviews and appraises their respective merits and limitations she then describes the interplay of a range of causal factors in abuse and neglect and considers different types of maltreatment and their potential consequences evidence for effective preventative and therapeutic measures are considered next followed by a final section on accurate assessment and the use of formal tools in risk management

Effective Interventions for Child Abuse and Neglect 2001-02

handbook of interventions that work with children and adolescents considers evidence based practice to assess the developmental issues aetiology epidemiology assessment treatment and prevention of child and adolescent psychopathology world leading contributors provide overviews of empirically validated intervention and prevention initiatives arranged in three parts part i lays theoretical foundations of treatments that work with children and adolescents part ii presents the evidence base for the treatment of a host of behaviour problems whilst part iii contains exciting prevention programs that attempt to intervene with several child and adolescent problems before they become disorders this handbook presents encouraging evidence that we can intervene successfully at the psychosocial level with children and adolescents who already have major psychiatric disorders and as importantly that we can even prevent some of these disorders from occurring in the first place

Handbook of Interventions that Work with Children and Adolescents 2004-01-09

mental health interventions for children and adolescents often flow from adult clinical models that emphasize change at the individual level yet to accomplish long lasting change for children and adolescents such services need also to consider developmental norms the developmental status of the child or adolescent and the fact that mental health issues for this population are embedded in family peer and sibling relationships in this book thomas j dishion and elizabeth a stormshak describe their family centered ecological approach which may be used as an intensive intervention or as a periodic preventive check up to have the greatest public health impact the approach can also be delivered in community settings such as schools the authors demonstrate how they examine psychopathology in children and adolescents in the context of the ecology families peer groups communities and schools in which they live they present their empirically derived approach and illustrate how developmentally and culturally relevant interventions are shaped given individual variation in vulnerability to environmental stress periodic assessments and interventions are used to prevent treat or reduce harm associated with problem behavior and emotional distress this promising approach places children in context and will be of interest to any therapist who wishes to understand the broad dynamics that influence their lives jacket psycinfo database record c 2007 apa all rights reserved

Intervening in Children's Lives 2007

the text provides information on the current levels of youth physical activity and offers an overview of theories of behavior change that have been used in developing physical activity interventions in a variety of settings

programs and interventions are discussed in terms of their strengths weaknesses and level of success also includes sample forms to assist the reader in evaluating and designing interventions in areas where proven programs are not yet available

Systematic Intervention with Disturbed Children 1984-07-31

therapists who work with children and adolescents are frequently faced with nonresponsive reticent or completely nonverbal clients this volume brings together expert clinicians who explore why 4 to 16 year olds may have difficulty talking and provide creative ways to facilitate communication a variety of play art movement and animal assisted therapies as well as trauma focused therapy with adolescents are illustrated with vivid clinical material contributors give particular attention to the neurobiological effects of trauma how they manifest in the body when children clam up and how to help children self regulate and feel safe most chapters conclude with succinct lists of recommended practices for engaging hard to reach children that therapists can immediately try out in their own work

Physical Activity Interventions in Children and Adolescents 2007
