the fascinating history of white solidarity with the black power movement in the mid 1960s as the politics of black self determination gained steam black activists had a new message for white activists go into your own communities and organize white people against racism while much of the media at the time and many historians since have regarded this directive as a white purge from the black freedom movement say burgin argues that it heralded a new strategy racially parallel organizing which people experimented with all over the country organizing your own shows that the black freedom movement never experienced a white purge and it offers a new way of understanding black power s relationship to white america by focusing on detroit from the mid 1960s through the mid 1970s this volume illuminates a wide cross section of white activists who took direction from black led groups like the northern student movement the city wide citizens action committee and the league of revolutionary black workers organizing your own draws on numerous oral histories and heretofore unseen archives to show that these white activists mobilized support for black self determination in education policing employment and labor unions it was a trial and error effort that pushed white activists to grapple with tough questions which white people should they organize and how which black led groups should they take direction from and when did taking black direction become mere sycophancy the story of detroit s

white fight for black power thus not only reveals a broader richer movement but it carries great insight into questions that remain relevant

Allies and Adversaries 2017

Britain's privatised railways continue to provoke debate about the organisation, financing and development of the railway system. This important book, written by Britain's leading railway historian, provides an authoritative account of the progress made by British Rail prior to privatisation and a unique insight into its difficult role in the government's privatisation planning from 1989. Based on free access to the British Railway Board's rich archives, the book provides a comprehensive analysis of the main themes: a process of continuous organisational change; the existence of a persistent government audit; perennial investment restraints; the directive to reduce operating costs and improve productivity; a concern with financial performance; technological change; service quality; and the management of industrial relations and the Board's ambiguous position as the Conservative government pressed home its privatisation programme. The introduction of sector management from 1982 and the Organising for Quality initiative of the early 1990s, the Serpell Report on Railway Finances of 1983, the sale of the subsidiary businesses, the large-scale investment in the Channel Tunnel and the obsession with safety which followed the Clapham accident of 1988 are all examined in depth. In the conclusion, the author reviews the successes and failures of the public sector, rehearses the arguments for and against integration in the railway industry and contrasts what many have termed the golden age of the mid-late 1980s when the British Rail government relationship was arguably at its most effective with what has happened since 1994.

includes 16 maps and 94 illustrations the focus of the american and british war effort in 1943 was on the ancient lands bordering the mediterranean sea where in may victory came at last in tunisia and where in july allied armies began a five week campaign to conquer sicily the invasion of italy in september sharpened that focus as allied troops

for the first time since 1940 confronted the german army in a sustained campaign on the mainland of europe the fighting that followed over the next eight months was replete with controversial actions and decisions these included apparent american peril during the early hours in the salerno beachhead a british advance from the toe of the peninsula that failed to ease the pressure at salerno the fight to cross a flooded rapido river the bombing of the benedictine abbey on monte cassino and the stalemated landings at anzio the author addresses these subjects objectively and candidly as he sets in perspective the campaign in italy and its accomplishments it was a grueling struggle for allied and german soldier alike a war of small units and individuals dictated in large measure by inhospitable terrain and wet and cold that soon immersed the battlefield the methods commanders and men employed to defeat the terrain and a resourceful enemy are instructive now and will continue to be in the future for the harsh conditions that were prevalent in italy know no boundary in time nor do the problems and accomplishments of allied command and co ordination anywhere stand out in greater relief than in the campaign in italy
