IBM OS/2 2.0 Basic IBM OS/2 2.0 VisualAge IBM VisualAge for Basic This is an anthology of the most useful and provocative articles on IBM's OS/2 2.0 which have appeared in the IBM Personal System Developer and IBM OS/2 System Developer organized for easy access and reliable reference. All articles have been reviewed for highest applicability and updated for maximum currency. The first authoritative guide to IBM's new OS/2 Warp 4 operating system, this book includes easy-to-follow step-by-step installation and configuration instructions, detailed checklists, reference information, speech recognition, and modular coverage of new and preexisting features for new and experienced OS/2 users. It covers LAN and Java run-time support and peer-to-peer networking starting from the ground up. This book shows how to write powerful, easy-to-use, fast, and reliable applications using the OS/2 2.1 Presentation Manager. It not only explains how to write PM apps but also how to create a friendly user interface exploiting all the WPS features such as drag and drop, direct manipulation, and extensive use of the pointer device. This updated edition features extensive revisions to explain OS/2 2.0 and its new functions. The authors also introduce new database features and incorporate them into RSQL. New SAA features, System View, and the distributed computing environment DCE are fully described. Code developed with OS/2 2.0's Workframe environment and the new 32-bit C Set 2 compiler enables users to make improvements in tasking APIs and PM calls. Other new sections in the edition address Novell TCP/IP, C/PI, C/CUA 91, and the OS/2 Workplace Shell. Explaining OS/2 Warp fundamentals and a range of basic PC tasks, an easy-to-use guide to IBM's new family of 32-bit operating systems also covers setting up your desktop, working with applications, managing files, and troubleshooting. Original beginner computers operating systems.
