The need for manufacturers to meet u s environmental protection agency epa mobile source diesel emissions standards for on highway light duty and heavy duty vehicles has been the driving force for the control of diesel particulate and nox emissions reductions diesel particulate emissions landmark research 1994 2001 contains the latest research and development findings that will help guide engineers to achieve low particulate emissions from future engines based on extensive sae literature from the past seven years the 45 papers in this book have been selected from the sae transactions journals

**Railroad Age Gazette** 1895 the book focuses on a global issue municipal solid waste management msww and presents the most effective solutions based on energy recovery processes there is huge potential in employing different technologies and modern management methodology for recovering energy from various waste streams to establish a sustainable and circular economy in several countries energy recovery from municipal solid wastes msww is seen as a way of reducing the negative impact of waste on the environment and also reducing the burden on land resources the book primarily focuses on highlighting the latest insights into energy recovery from various waste streams in different countries with a particular emphasis on india further it paves the way for sustainability in the energy sector as a whole by addressing waste management issues and simultaneous energy recovery the chapters present high quality research papers selected and presented in the conference iconsww 2018
