American Philanthropy at Home and Abroad 2022-08-11

american philanthropy at home and abroad explores the different ways in which charities voluntary associations religious organisations philanthropic foundations and other non state actors have engaged with traditions of giving using examples from the late eighteenth century to the cold war the collection addresses a number of major themes in the history of philanthropy in the united states these examples include the role of religion the significance of cultural networks and the interplay between civil diplomacy and international development as well as individual case studies that challenge the very notion of philanthropy as a social good led by ben offiler and rachel williams the authors demonstrate the benefits of embracing a broad definition of philanthropy examining how american concepts including benevolence and charity have been used and interpreted by different groups and individuals in an effort to shape and at least nominally to

improve people s lives both within and beyond the united states

Russian Music at Home and Abroad 2016-09-06

this new collection views russian music through the greek triad of the good the true and the beautiful to investigate how the idea of nation embeds itself in the public discourse about music and other arts with results at times invigorating at times corrupting in our divided post-cold war and now post-9/11 world russian music formerly a quiet corner on the margins of musicology has become a site of noisy contention richard taruskin assesses the political and cultural stakes that attach to it in the era of pussy riot and renewed international tensions before turning to individual cases from the nineteenth century to the present much of the volume is devoted to the resolutely cosmopolitan but inveterately russian igor stravinsky one of the major forces in the music of the twentieth century and subject of particular interest to composers and music theorists all over the world taruskin here revisits him for the first time since the 1990s when everything changed for russia and its cultural products other essays are devoted to the cultural and social policies of the soviet union and their effect on the music produced there as those policies swung away from communist internationalism to traditional russian nationalism to the musicians of the

russian postrevolutionary diaspora and to the tension between the compelling artistic quality of works such as stravinsky's *sacre du printemps* or prokofiev's *zdravitsa* and the antihumanistic or totalitarian messages they convey russian music at home and abroad addresses these concerns in a personal and critical way characteristically demonstrating taruskin's authority and ability to bring living history out of the shadows

Tariff Hearings Before the Committee on Ways and Means of the House of Representatives, Sixtieth Congress, 1908-1909 1909

industrial production and consumption patterns rely heavily on the intensive use of both renewable and non renewable resources and the consequences for the environment can be serious following a long period of time where the profit incentives of firms have prevailed over

preservation of the environment and the world's natural resources a new consensus has emerged concerning the need to regulate firm behaviour aimed at ensuring the sustainability of the economic system in the long run this book offers an exhaustive overview of current economic debate about these topics taking modern oligopoly theory as a benchmark the first part of the book covers static models dealing with incentives for green research and development pigovian taxation cartels environmental quality and international trade as well as the role of corporate social responsibility public firms and consumer environmental awareness as endogenous regulatory instruments then the author moves on to examine the role of time while drawing from optimal control and differential game theory this opens the way to the discussion of fair discount rates to ensure the welfare of future generations as well as the long run sustainability of production and consumption patterns
