literature and the brain goes straight to the human core of literature when it explains the different ways our brains convert stories poems plays and films into pleasure when we are deep into a film or book we find ourselves absorbed unaware of our bodies or our surroundings we don't doubt the existence of spider man or harry potter and we have real feelings about these purely imaginary beings our brains are behaving oddly because we know we cannot act to change what we are seeing this is only one of the special ways our brains behave to with literature ways that literature and the brain reveals 474 pp 13 ill originally published in 1988 this book brings brain science to literary criticism the brain of robert frost combines psychoanalysis with the findings of brain research and cognitive psychology to model the way we create and respond to literature norman holland draws three central ideas from the mind's new science the critical supercharged period in infancy when individuality is formed the binding of emotion to intellect deep in the old brain the top down inside out feedback processing of language in the new then using robert frost as an example both of a writer and a reader and comparing frost's reading of a poem to readings by six professors of literature holland builds a new powerful way of thinking about literary criticism and teaching a book about literary cognition the brain of robert frost furthers our understanding of the reading process of poet's brains and of our own it took shakespeare 25 years to create his legacy of 38 plays and five years for coculuzzi and toner to destroy it shakespeare's sports canon transforms the complete works of william shakespeare into a hilarious hybrid of improvised sporting play and spectacle theatre presented as live ucsn upstart crowd sports network broadcasts the sports canon includes shakespeare's rugby wars the wars of the roses tetralogy presented as a rugby match as team lancaster and team york scrum it out for the british crown and rugby supremacy shakespeare's world cup the famous four tragedies as team denmark england scotland and italy kick out the blank verse for top tragic cup shakespeare's gladiator games the roman and greek plays as a traditional roman ludi where gladiators vie for the coveted wooden rudis and with it their freedom shakespeare's comic olympics all of the comedies and romances as olympic events as athletes strive to overcome comic feats of timing in their quest for ring finger gold shakespeare's nhl national history league the leftover histories as a tribute to canadian street hockey and homage to the original six as hockey's historical heroes faceoff for lord stanley's impressive cup thus this book is based on both luxuries knowledge from his side and the radiance of nur muhammad these are the two luxuries that every muslim should pursue because there is no luxury without these two luxuries the luxury that fueled the rise of medieval islamic civilization 9th century to the 12th century and inspired the rise of the modern western world as a result this book is nothing but a form of gratitude for his knowledge so there is no other motivation other than these luxuries in addition it is also gratitude for all situations i believe that there is no evil la ilaha illallah that there is nothing but his existence nothing is free separate or independent from his existence everything takes place within the boundaries of his law even man's free will interacts and integrates with the unity of his law therefore may allah bless us with an abundance of goodness in all of our situations based on little read texts this book explains how gentile and his scholastic contemporaries were seen as successful doctors in the late middle ages it relates the technical content of their elaborate treatises to the expectations of pupils and patients and argues that scholasticism helped to mould those expectations alisa solomon examines the relationship between gender and performance in a series of essays that consider theatrical texts and productions from the time of aristophanes through to the modern era an exploration of the magic rites and practices of traditional witchcraft both past and present nice and naughty the truth is magic is the stuff of witchcraft the very life blood that gives vibrancy in all its other aspects we are all born with a capacity for practicing magic yet it is a topic that strikes fear into many for what it might actually do to them magic has a bad reputation notwithstanding that it guided our ancient ancestors to initially develop the survival skills and techniques that have ultimately led to our modern day world of science and technology magic means pushing the boundaries of what might just be possible it implies change and therefore unsanctioned magic has always been seen as a threat to the status quo nevertheless it is a fascinating discipline exploring developing and expanding one's own mental powers it entails a quest from the magic of love and sex to witcherie with a purpose demands skill determination and ability from astral projection to psychic protection from magical healing to communicating with spiritual entities from the astral the practice of traditional witchcraft demands a knowledge of apies magic both the nice and the naughty but best not the practice of its really naughty aspects a witches canon part 1 provides a fact based referenced guide for those wishing to further explore the religion and celebratory rituals of traditional wicca a witches canon contemporary works of art that remodel the canon not only create complex hybrid and plural products but also alter our perceptions and understanding of their source texts this is the dual process referred to in this volume as refraction that the essays collected here set out to discuss and analyse by focusing on the dialectic rapport between postmodernism and the canon what is sought in many of the essays is a redefinition of postmodernist art and a re examination of the canon in the light of contemporary epistemology given this dual process this volume will be of value both to everyone interested in contemporary art particularly fiction drama and film and also to readers whose aim it is to promote a better appreciation of canonical british literature the authors present a new perspective on a wide range of issues in the study of literature and culture some of the topics discussed such as interpretation canon formation and literary historiography belong to the traditional domain of literary studies others cultural identity convention systems theory and empirical methods originate in the social sciences and are now being integrated into the humanities by referring to the work of authors as widely apart as hayden white edward said fredric jameson michel foucault jacques derrida reinhart koselleck pierre bourdieu niklas luhmann siegfried schmidt norbert groeben and many others the full complexity of the field of literary studies becomes apparent the authors argue for a distinction between analysis of literary systems on the one hand and critical intervention on the other by distinguishing between research and criticism between knowledge and commitment they offer new ways for literary studies as well as for cultural critique humor in the caribbean literary
