Language Primer 1902 the increasing globalization and centralization
in the world is threatening the existence of a large number of smaller
languages in south asia some locally dominant languages e g hindi urdu
nepali are gaining ground beside english at the expense of the lesser
known languages despite a long history of stable multilingualism
language death is not uncommon in the south asian context we do not
know how the language situation in south asia will be affected by
modern information and communication technologies will cultural and
linguistic diversity be strengthened or weakened as they become
increasingly prevalent in all walks of life this volume brings
together areas of research that so far do not interact to any
significant extent traditional south asian descriptive linguistics and
sociolinguistics documentary linguistics issues of intellectual and
cultural property and fieldwork ethics and language technology
researchers working in the areas of documentary linguistics and
language technology have become aware of each other in the last few
years and of how work in the other area could be potentially useful in
furthering their own aims similarly the insights of documentary
linguistics are making their way into descriptive linguistics and
sociolinguistics however the potential for synergy among these areas
of research is almost limitless this volume provides the reader not so
much with a do it yourself recipe for applying modern technology to
the problem of language shift in south asia today but rather with some
basic knowledge about the problems involved and some directions from
which solutions could be forthcoming a toolbox rather than a blueprint
for helping to shape the linguistic future of south asia
