this hcot volume completes houtman s monumental commentary on the book of exodus it covers the legal texts the decalogue and the book of the covenant and most of the sinai narrative beside a detailed and deliberate interpretation it provides an invaluable guide to the literature and the issues the treatment of the tabernacle chapters is of particular interest the corresponding sections about the instructions for and the making of each part of the tabernacle are discussed together and placed in side by side columns in the translation this excellent sudy will certainly make history m vervenne in ephemerides theologicae lovanienses 68 1992 409 a splendid work j w wevers in bibliotheca orientalis 52 1995 743 the learning assembled in this massive work will be invaluable to students of exodus g i davies in vetus testamentum 48 1998 572 cornelis houtman is professor of old testament at the theological university kampen

## **Fundamentals of Global Strategy**

2010-08-20

now in paperback the oxford textbook of oncology reflects current best practice in the multidisciplinary management of cancer written and edited by internationally recognised leaders in the field structured in six sections the book provides an accessible scientific basis to the key topics of oncology examining how cancer cells grow and function as well as discussing the aetiology of cancer and the general principles governing modern approaches to oncology treatment the book examines the challenges presented by the treatment of cancer on a larger scale within population groups and the importance of recognising and supporting the needs of individual patients

both during and after treatment a series of disease oriented case based chapters ranging from acute leukaemia to colon cancer highlight the various approaches available for managing the cancer patient including the translational application of cancer science in order to personalise treatment the advice imparted in these cases has relevance worldwide and reflects a modern approach to cancer care the oxford textbook of oncology provides a comprehensive account of the multiple aspects of best practice in the discipline making it an indispensable resource for oncologists of all grades and subspecialty interests

## ***Teaching and Preaching the Word***

2010-06

this lab book is designed to accompany any text for the mineralogy petrology course it contains 35 self contained exercises and is thus valuable for either lab work or self study by the student most of the exercises contain extensive background material and worked examples allowing the student to work through the manual without the aid of a lab assistant so that the lab instructor does not need to design the assignments most of the exercises also contain all the relevant details needed for the exercises spirally bound students may remove assignments to be handed in to course instructors

in his now classic voices of collective remembering james v wertsch 2002 examines the extent to which certain narrative themes are embedded in the way the collective past is understood and national communities are imagined in this work wertsch coined the term schematic narrative templates to refer to basic plots such as the triumph over alien forces or quest for freedom that are recurrently used setting a national theme for the past present and future whereas specific narratives are about particular events dates settings and actors schematic narrative templates refer to more abstract structures grounded in the same basic plot from which multiple specific accounts of the past can be generated as dominant and naturalised narrative structures schematic narrative templates are typically used without being noticed and are thus extremely conservative impervious to evidence and resistant to

change the concept of schematic narrative templates is much needed today especially considering the rise of nationalism and extreme right populism political movements that tend to tap into national narratives naturalised and accepted by large swathes of society the present volume comprises empirical and theoretical contributions to the concept of schematic narrative templates by scholars of different disciplines historiography psychology education and political science and from the vantage point of different cultural and social practices of remembering viz school history teaching political discourses rituals museums the use of images maps etc in different countries the volume s main goal is to provide a transdisciplinary debate around the concept of schematic narrative templates focusing on how narratives change as well as perpetuate at times when nationalist discourses seem to be on the rise this book will be relevant to anyone interested in history history teaching nationalism collective memory and the wider social debate on how to critically reflect on the past

## **Manual of Mineral Science**

1995

first multi year cumulation covers six years 1965 70

## **A Miracle Mirrored**

1989

this book describes and analyses the history of dutch mathematics education from the point of view of the changing motivations behind the teaching of mathematics over a 200 year period during the course of the 19th century mathematics in the netherlands developed from a topic for practitioners into a school topic that was taught to almost all pupils of secondary education as mathematics teaching gradually lost its practical orientation and became more and more motivated on the basis of its supposed formative value the hbs hogere burgerschool the dutch variant of the german realschule became the dominant school of thought for mathematics pedagogy this book examines the gradual development of the field culminating in the country wide adoption of realistic mathematics education as the new method of mathematics teaching this book is important for anyone who is interested in the history of mathematics education it provides an interesting perspective on the development of mathematics education in a country that in many aspects went its own way

## **Engineers of Happy Land**

2014-01-07

this book presents a rigorous hugely informative analysis of the early history of dutch children s literature pedagogical developments and emerging family formations thoroughly researched dietz s study will be essential for historians of eighteenth century childhood education and children s books both in the dutch context and more widely matthew grenby newcastle university uk a rich informative well documented and effectively illustrated discussion of the ways dutch eighteenth century educators tried to transform youth into responsible readers it does so in a wide international context and masterfully connects this process to the radical politicization and de politicization of dutch society in the revolutionary period wijnard w mijnhardt formerly of utrecht university the netherlands and the university of california at los angeles usa this book explores how children s literature and literacy could at once regulate and empower young people in the eighteenth century dutch republic rather than presenting the history of childhood as a linear story of increasing agency it suggests that we view it as a continuous struggle with the impossibility of full agency for young people this volume demonstrates how this struggle informed the production of books in a historical context in which the development of independent youths was high on the political agenda in close interaction with international children s literature markets dutch authors developed new strategies to make the members of young generations into capable readers and writers equipped to organize their own minds and bodies properly and to support a supposedly declining fatherland
