excerpt from the elements of language the following pages are quite unconventional and no doubt differ considerably from the accepted type of grammatical text book they put forward nevertheless no new theory they deal with a method rather than with a theory and their aim is simple and definite to meet certain practical difficulties which exist in the teaching of language more especially of latin in certain kinds of school the present writer has been responsible for a school of moderate size for the last nine years he has been subject during most of that time to the restrictions of the board of education and has had to deal with perhaps a larger proportion than usual of boys whose school life has been short nearer three years than four and who began it without any previous preparation in any language but their own he has no desire to dogmatise about other schools and about other people s experience but as far as his own goes there is no question in his mind but that the problem of teaching latin and indeed language generally in the modern state controlled secondary school is an utterly different one from what it was when time tables were roughly divided between classics and mathematics and when school life extended to seventeen or eighteen about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the

original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from elements of language and general grammar the object of the writer of this book has been to supply what he trusts may prove for the present at least a desideratum of which the want has been long felt there are extant indeed even in our own language several learned and able treatises on the principles of language and general grammar but for the most part they are contained in large and expensive works to which comparatively few persons have access while none of them are precisely adapted to the class of readers for whose benefit this work is designed about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
