Ann I Phillips develops two original cases of German relations with East Central Europe to test competing arguments as she convincingly demonstrates the politics of reconciliation and the activities of German party-affiliated foundations illustrate German engagement in the region in its dual faces: restraint and projection. The author uses the less-developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis. These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other, contributing to the theoretical debate. Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo-realist or liberal approaches could not. The author's fresh perspective and new evidence demonstrate that East-Central European states play a much greater role in the influence equation than they did in the past.

challenging conventional wisdom about German dominance in the new Europe, this study presents a new approach to the question of power and influence after the Cold War. Inspired by the debate over German hegemony and drawing on intensive fieldwork, Ann I. Phillips develops two original cases of German relations with East-Central Europe to test competing arguments. As she convincingly demonstrates, the politics of reconciliation and the activities of German party-affiliated foundations illustrate German engagement in the region in its dual faces: restraint and projection. The author uses the less-developed literature on reciprocal influences of domestic politics and the international environment to frame her analysis. These two cases provide evidence not only of the intersection of domestic politics and international relations but of when and how one trumps the other, contributing to the theoretical debate. Phillips argues that this interplay explains the divergent trajectories bilateral relations have taken since 1990 in ways that more traditional neo-realist or liberal approaches could not. The author's fresh perspective and new evidence demonstrate that East-Central European states play a much greater role in the influence equation than they did in the past.

A vital resource for search and rescue professionals and physicians as well as outdoor enthusiasts includes new chapters to cover cold injuries and strategies for survival that weren't in the previous edition. Hikers, skiers, climbers, hunters, fishermen, bicyclists, and lost children all are potentially at risk of hypothermia or other cold injuries, including frostbite and trenchfoot. Cold water immersion is also a major cause of death in boating accidents. Yet, as shown in anecdotes from the updated second edition of *Hypothermia, Frostbite, and Other Cold Injuries*, many people have died unnecessarily succumbing to cold effects long before hypothermia sets in. This compact, comprehensive book covers the causes and effects of hypothermia and other cold injuries and tells how to prevent, recognize, and treat them. Included is coverage of how the body loses heat and the latest rewarming techniques, such as thermal wraps. This edition has added chapters on cold water drowning and covers additional cold injuries from Raynaud's phenomenon to cold-induced asthma. You'll also find strategies for cold weather survival, plus safe practices for working on the ice and ice water escape and rescue techniques.

with his policy of containment us diplomat george f kennan 1904-2005 devised a way to resist the soviet union's attempt to conquer the world for communism that way was to go to the brink of war to prevent war his idea was first expressed in his famous long telegram from moscow on february 22 1946 it took genius to see a wartime ally as a dangerous adversary and to convince the american leadership to act upon it back in the united states the young diplomat first acted as deputy commandant in the national war college he then operated as director of the state department's policy planning staff to restore europe from wartime destruction by 1950 kennan began to reverse his thinking believing that the military component of american policy was going too far while his old colleagues continued to develop us power given point by the atomic bomb kennan withdrew from government and began a new career as a public intellectual campaigning for a more peaceable policy in his eighteen books and articles and talks the breakdown of the soviet economy in the 1980s showed that kennan was right the second time as well always sympathetic to the russian people and culture which the later soviet leaders appreciated kennan was able to welcome the new non communist russia into a more peaceable relationship with the democracies that ended the cold war his life and works have become a national treasure

us foreign policy during the cold war has been analysed from a number of perspectives generating large bodies of literature attempting to explain its origins its development and its conclusion however there are still many questions left only partially explained in large part this is because these accounts restrict themselves to a single level of analysis either the international system or the structure of the state and society the first level of analysis focusing on the role of individuals has largely been excluded this book argues that structural theories and any approach that limits itself to one level of analysis are inadequate to explain the development of us foreign policy instead it is necessary to incorporate the first level of analysis in order to bring human agency back and provide a more detailed explanation of us foreign policy bilstrand proposes an analytical framework which incorporates presidential agency into a multi level analysis of us foreign policy during the cold war constructing a multi level case study comparison of the foreign policies of presidents truman and reagan he argues that the worldview of the president is central to agenda setting in us foreign policy making and that the management style of the president influences both decision making and the implementation of us foreign policy evidence to support this is drawn from detailed empirical analysis of truman s foreign policy of containment in korea and reagan s foreign policy of rollback in nicaragua this work will be of interest to students and scholars of us foreign policy us history and international relations

this book demonstrates that under the leadership of president ronald reagan and through the mechanism of his national security council staff the united states developed and executed a comprehensive grand strategy involving the coordinated use of the diplomatic informational military and economic instruments of national power and that grand strategy led to the collapse of the soviet union in doing so it refutes three orthodoxies that reagan and his administration deserve little credit for the end of the cold war with most of credit going to mikhail gorbachev that reagan s management of the national security council staff was singularly inept and that the united states is incapable of generating and implementing a grand strategy that employs all the instruments of national power and coordinates the work of all executive agencies the reagan years were hardly a time of interagency concord but the national security council staff managed the successful implementation of its program nonetheless
