is it possible to learn to write with talent or is writing only for a select few why does the ability to express your thoughts

and ideas beautifully give you inner freedom a story a piece a novel every literate person can write whether it can be read is another matter but that s another story not all violinists are paganini but not all writers either are shakespeare nevertheless their books are on the shelves and many authors receive huge royalties fortunately literature is not mathematics where you cannot start studying new material until you master the previous material in literature you can take useful knowledge in pieces like from a reference book or an encyclopedia to rise to the level of shakespeare and others you first need to master at least the simplest methods of influencing the reader writing is almost the only profession in the world where even a shy person can breakthrough after all no one will know how many attempts it took to do this and you can tell your friends that the first time you hit the target this book will give you the basics of writing at first glance it may seem that it is too simple but perhaps rereading it in a few days will offer even more substance the fact is that many people today are often incapable of perceiving long complex thoughts as we are bombarded with technology and social media attention spans are short and at the same time we may not always be able to immediately see things that are fundamental and useful to us use this book as a writing guide or as a helper scroll up and click buy now today or better yet buy a paperback to always have it at hand

observations plus recipes it has been said that science is the orderly collection of facts about the natural world scientists however are wary of using the word fact fact has the feeling of absoluteness and universality whereas scientific observations are neither absolute nor universal for example children have 20 deciduous baby teeth is an observation about the real world but scientists would not call it a fact some children have fewer deciduous teeth and some have more even those children who have exactly 20 deciduous teeth use the full set during only a part of their childhood when they are babies and toddlers children have less than 20 visible teeth and as they grow older children begin to lose their deciduous teeth which are then replaced by permanent teeth children have 20 deciduous baby teeth is not even a complete scientific statement for one thing the statement children have 20 deciduous teeth does not tell us what we mean by teeth when we say teeth do we mean only those that can be seen with the unaided eye or do we also include the hidden unerupted teeth an observation such as children have 20 deciduous teeth is not a fact and by itself it is not acceptable as a scientific statement until its terms are explained scientifically children have 20 deciduous teeth must be accompanied by definitions and qualifiers
