Multimodality

2019-11-18

multimodality's popularity as a semiotic approach has not resulted in a common voice yet its conceptual anchoring as well as its empirical applications often remain localized and disparate and ideas of a theory of multimodality are heterogeneous and uncoordinated for the field to move ahead it must achieve a more mature status of reflection mutual support and interaction with regard to both past and future directions the red thread across the disciplines reflected in this book is a common goal of capturing the mechanisms of synergetic knowledge construction and transmission using diverse forms of expressions i e multimodality the collection of chapters brought together in the book reflects both a diversity of disciplines and common interests and challenges thereby establishing an excellent roadmap for the future the contributions revisit and redefine theoretical concepts or empirical analyses which are crucial to the study of multimodality from various perspectives with a view towards evolving issues of multimodal analysis with this the book aims at repositioning the field as a well grounded scientific discipline with significant implications for future communication research in many fields of study

started he also answers questions such as how has affirmative action affected workplaces what are the benefits of cultivating diversity of thought how can you make diversity initiatives robust and inclusive the author emphasizes that it is better to have small successes than to overcommit underdeliver and lose credibility achieve a culture of diversity of thought by successfully implementing diversity equity inclusion and belonging initiatives with the insights and action steps in thoughtful diversity

The Diversity Scorecard

2012-07-26

the diversity scorecard is designed to provide step by step instructions worksheets and examples to help diversity executives and managers analyze and track the impact of their diversity initiatives to mobilize the organization for strategic culture change diversity is not a program it is a systemic process of organizational change that requires measurement for organizational improvement and success measuring the progress and results of diversity initiatives is a key strategic requirement to demonstrate its contribution to organizational performance diversity executives professionals and managers know they must begin to show how diversity is linked to the bottom line in hard numbers or they will have difficulty maintaining funds gaining support and obtaining resources to generate progress many organizations collect some type of diversity related data today even if it focuses only on affirmative action statistics the diversity scorecard focuses on tools and techniques to make sure diversity professionals are collecting and measuring the right type of data that will help ensure the organization s success both now and in the future this book helps the reader spend some time thinking about what they currently measure and adding new measures to a database to track progress towards their diversity vision the basic premises of this book are that it is important to develop measures that focus on the past present and future and that measures need to consider the needs of the organization s diverse workforce its work climate diverse customers the community and shareholders part i of the diversity scorecard identifies the need for diversity measurement highlighting a business case for diversity and providing an introduction to diversity measurement part ii of the book outlines the diversity return on investment droi process taking you through step by step processes and techniques part iii teaches you how to use measures in six key categories diversity leadership commitment workforce profile representation workplace climate learning growth diverse customer community partnerships and financial impact to build a diversity scorecard that is aligned and linked with the business strategy of the organization finally in part iv dr hubbard discusses implementation issues involving strategic change procedures and techniques to avoid the pitfalls inherent in a diversity based cultural transition process

the work of elinor and vincent ostrom represents a distinctive contribution to the study of political economy public policy and administration collective action and governance theory efforts to present a comprehensive overview of the bloomington school that grew around the workshop in political theory and policy analysis now renamed the ostrom workshop which they founded more than 40 years ago received new impetus with the award of the nobel memorial prize in economic science to elinor ostrom in 2009 since then renewed attempts have been made to map the ostroms contributions to theories of polycentric governance and

collective action and to multi methods and comparative institutional analysis of ways of managing social and ecological systems common pool resources public economies and metropolitan reform the open ended and multiform nature of the ostroms research program defies a single comprehensive overview yet it is a stimulus towards both creativity and disciplinary cross fertilization in social science research what sets this volume apart is that it brings together theory and practice models and work on the ground design and creativity empirics and norms to outline the significance of the ostroms research program for the future each contribution to the volume takes the ostromian perspective as the point of departure amplifies it and explores the ground for future work by engaging with other approaches and areas of research with which the bloomington school has some affinities this way of testing and extending the ideas and methods of the ostroms is particularly appropriate since their research program initiated and nurtured through the workshop has always been in between different fields and sub fields in the social sciences political science economics public administration law history anthropology cultivating a strong interdisciplinary way of doing research and exploiting the virtuous circle between theory analysis model building and empirical research engaging in a creative dialogue with ideas and methods of other research programs is a way of sharpening one s analytic tools while renovating one s own vision of social research this volume is a way of thinking through and beyond the bloomington school
