 analysis 9 4 summary and conclusions references index the issue of medical ethics from thorny  
 moral questions such as euthanasia and the morality of killing to political questions such as the fair  
 distribution of health care resources is rarely out of today s media this area of ethics covers a wide  
 range of issues from mental health to reproductive medicine as well as including management issues  
 such as resource allocation and has proven to hold enduring interest for the general public as well  
 as the medical practitioner this very short introduction provides an invaluable tool with which to  
 think about the ethical values that lie at the heart of medicine this new edition explores the ethical  
 reasoning we can use to approach medical ethics introducing the most important tools of ethical  
 reasoning and discussing how argument thought experiments and intuition can be combined in the  
 consideration of medical ethics considering its practical application tony hope and michael dunn  
 explore how medical ethics supports health professionals through the growing use of ethics  
 expertise in clinical settings they also contemplate the increasingly important place of medical ethics  
 in the wider social context particularly in this age of globalization not only in healthcare practice but  
 also policy discussions in the media pressure group and activism settings and in legal judgments  
 about the series the very short introductions series from oxford university press contains hundreds  
 of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a  
 new subject quickly our expert authors combine facts analysis perspective new ideas and  
 enthusiasm to make interesting and challenging topics highly readable □□□□□□□□□□□□□□□□□□□□

data science and optimization in a wide range of applications including optics quantum mechanics  
data journalism and finance  
conservation of easel paintings is the first comprehensive text on the history philosophy and  
methods of treatment of easel paintings that combines both theory with practice with contributions  
from an international group of experts and interviews with important artists this volume provides an  
all encompassing guide to necessary background knowledge in technical art history artists materials  
scientific methods of examination and documentation with sections that present varying approaches  
and methods for treatment including consolidation lining cleaning retouching and varnishing the  
book concludes with a section featuring issues of preventive conservation storage shipping  
exhibition lighting safety issues and public outreach conservation of easel paintings is a crucial  
resource in the training of conservation students and will provide generations of practicing paintings  
conservators and interested art historians curators directors collectors dealers artists and students  
of art and art history with invaluable information and guidance exam board ocr specification b shp  
level gcse 9 1 subject history first teaching september 2016 first exams summer 2018 an ocr  
endorsed textbook let shp successfully steer you through the ocr b specification with an exciting  
enquiry based series combining best practice teaching methods and worthwhile tasks to develop  
students historical knowledge and skills the engaging accessible text covers the content you need for  
teacher led lessons and independent study step by step enquiries inspired by best practice in ks3  
help to simplify lesson planning and ensure continuous progression within and across units the  
scaffolded three part task structure enables students to record reflect on and review their learning  
suitably challenging tasks encourage high achievers to excel at gcse while clear explanations make  
key concepts accessible to all a range of purposeful intriguing visual and written source material is  
embedded at the heart of each investigation to enhance understanding memorable case studies  
diagrams infographics and contemporary photos bring fascinating events and people to life caves  
have been used in various ways across human society but despite the persistence within popular  
culture of the iconic caveman deep caves were never used primarily as habitation sites for early  
humans rather in both ancient and contemporary contexts caves have served primarily as ritual  
spaces in sacred darkness contributors use archaeological evidence as well as ethnographic studies  
of modern ritual practices to envision the cave as place of spiritual and ideological power and a  
potent venue for ritual practice covering the ritual use of caves in europe asia australia africa  
mesoamerica and the us southwest and eastern woodlands this book brings together case studies by  
prominent scholars whose research spans from the paleolithic period to the present day these  
contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the  
understanding of both ancient and modern religious beliefs and practices this state of the art survey  
of ritual cave use will be one of the most valuable resources for understanding the role of caves in  
studies of religion sacred landscape or cosmology and a must read for any archaeologist interested  
in caves created to help scientists and engineers write computer code this practical book addresses  
the important tools and techniques that are necessary for scientific computing but which are not yet  
commonplace in science and engineering curricula this book contains chapters summarizing the  
most important topics that computational researchers need to know about it leverages the  
viewpoints of passionate experts involved with scientific computing courses around the globe and  
aims to be a starting point for new computational scientists and a reference for the experienced each  
contributed chapter focuses on a specific tool or skill providing the content needed to provide a  
working knowledge of the topic in about one day while many individual books on specific computing  
topics exist none is explicitly focused on getting technical professionals and students up and running  
immediately across a variety of computational areas infoworld is targeted to senior it professionals  
content is segmented into channels and topic centers infoworld also celebrates people companies  
and projects good to great why some companies make the leap and others do not

## **Bayesian Data Analysis**

2013-11-27

the first edition appeared fourteen years ago since then there have been significant advances in our

science that warrant an updating and revision of sand and sandstone the main framework of the first edition has been retained so that the reader can begin with the mineralogy and textural properties of sands and sandstones progress through their organization and classification and their study as a body of rock to consideration of their origin provenance transportation deposition and lithification and finally to their place in the stratigraphic column and the basin the last decade has seen the rise of facies analysis based on a closer look at the stratigraphic record and the recognition of characteristic bedding sequences that are the signatures of some geologic process such as a prograding shallow water delta or the migration of a point bar on an alluvial floodplain the environment of sand deposition is more closely determined by its place in such depositional systems than by criteria based on textural characteristics the fingerprint approach our revision reflects this change in thinking as in the geological sciences as a whole the concept of plate tectonics has required a rethinking of our older ideas about the origin and accumulation of sediments especially the nature of the sedimentary basins

caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans rather in both ancient and contemporary contexts caves have served primarily as ritual spaces in sacred darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice covering the ritual use of caves in europe asia australia africa mesoamerica and the us southwest and eastern woodlands this book brings together case studies by prominent scholars whose research spans from the paleolithic period to the present day these contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices this state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves

fourteen years since its establishment the work of the african commission on human and peoples rights has not received the attention that should have been paid to its important contributions towards the promotion and protection of human rights in africa the aim of this publication is to provide not only the basic documents but also the less well known material related to the jurisprudence emanating from the consideration of communications this volume therefore includes amongst other material the twelve activity reports adopted by the commission resolutions and final communiqués from the sessions this is the first attempt to reproduce comprehensively the many

documents of the commission adopted since its inception in 1987 it will be an essential reference for academics students and practitioners the publication is produced in collaboration with the african society for international and comparative law the centre for human rights at the university of pretoria and interights in london
