in vietnam while researching phoenix valentine learned that the cia allowed opium and heroin to flow from its secret bases in laos to generals and politicians on its payroll in south vietnam his investigations into this illegal activity focused on the cia s relationship with the federal drugs agencies mandated by congress to stop illegal drugs from entering the united states based on interviews with senior officials valentine wrote two subsequent books the strength of the wolf and the strength of the pack showing how the cia infiltrated federal drug law enforcement agencies and commandeered their executive management intelligence and foreign operations staffs in order to ensure that the flow of drugs continues unimpeded to traffickers and foreign officials in its employ ultimately portions of his research materials would be archived at the national security archive texas tech university s vietnam center and john jay college this book includes excerpts from the above titles along with updated articles and transcripts of interviews on a range of current topics with a view to shedding light on the systemic dimensions of the cia s ongoing illegal and extra legal activities these terrorism and drug law enforcement articles and interviews illustrate how the cia s activities impact social and political movements abroad and in the united states a common theme is the cia s ability to deceive and propagandize the american public through its impenetrable government sanctioned shield of official secrecy and plausible deniability though investigated by the church committee in 1975 cia praxis then continues to inform cia praxis now valentine tracks its steady infiltration into practices targeting the last population to be subjected to the exigencies of the american empire the american people

this volume contains papers selected for presentation at the 6th iapr workshop on document analysis systems das 2004 held during september 8 10 2004 at the university of florence italy several papers represent the state of the art in a broad range of traditional topics such as layout analysis applications to graphics recognition and handwritten documents other contributions address the description of complete working systems which is one of the strengths of this workshop some papers extend the application domains to other media like the processing of internet documents the peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents a taste which frequently requires the analysis of color documents a total of 17 papers are associated with these topics whereas two years ago in das 2002 only a couple of papers dealt with these problems in our view there are three main reasons for this new wave in the das community from the scientific point of view several research groups reached a thorough knowledge of techniques and problems that can be effectively solved and this expertise can now be applied to new domains another incentive has been provided by several research projects funded by the ec and the nsf on topics related to digital libraries
