Classical and Quantum Physics 2019-10-26 this proceedings is based on the interdisciplinary workshop held in madrid 5 9 march 2018 dedicated to alberto ibort on his 60th birthday alberto has great and significantly contributed to many fields of mathematics and physics always with highly original and innovative ideas most of albertos s scientific activity has been motivated by geometric ideas concepts and tools that are deeply related to the framework of classical dynamics and quantum mechanics let us mention some of the fields of expertise of alberto ibort geometric mechanics constrained systems variational principles multisymplectic structures for field theories super manifolds inverse problem for bosonic and fermionic systems quantum groups integrable systems brst symmetries implicit differential equations yang mills theories bihamiltonian systems topology change and quantum boundary conditions classical and quantum control orthogonal polynomials quantum field theory and noncommutative spaces classical and quantum tomography quantum mechanics on phase space wigner weyl formalism lie jordan algebras classical and quantum quantum to classical transition contraction of associative algebras contact geometry among many others in each contribution one may find not only technical novelties but also completely new way of looking at the considered problems even an experienced reader reading alberto s contributions on his field of expertise will find new perspectives on the considered topic his enthusiasm is happily contagious for this reason he has had and still has very bright students wishing to elaborate their phd thesis under his guidance what is more impressive is the broad list of rather different topics on which he has contributed

Technology Enhanced Learning for People with

Disabilities: Approaches and Applications 2010-08-31 this

book brings together academics policy makers and practitioners with the goal of delivering a reference edition for all those interested in approaches and applications of technology enhanced learning for people with disabilities provided by publisher

Iberian Books Volumes II & III / Libros Ibéricos

Volúmenes II y III (2 vols) 2015-10-05 iberian books ii iii offer an indispensable foundational listing of all books published in spain portugal and the new world in the first half of the seventeenth century they record information on 45 000 items surviving in 215 000 copies worldwide iberian books ii iii ofrece registro de lo publicado en españa portugal y el nuevo mundo o en español o portugués en otros lugares entre 1601 y 1650 recoge 45 000 impresos conservados en 215 000 ejemplares preservados en 1 800 colecciones

Agile Estimation Techniques and Innovative Approaches to Software Process Improvement

2014-02-28 applying methodologies of software process improvement spi is an effective way for businesses to remain competitive in the software industry however many organizations find implementing software process initiatives challenging agile estimation techniques and innovative approaches to software process improvement reviews current spi techniques and applications through discussions on current and future trends as well as the presentation of case studies on spi implementation ideal for use by academics students and policy makers as well as industry professionals and managers this publication provides a complete overview of current tools and methodologies regarding software process improvement CARLOS III 1988 in the past few decades computer hardware description languages chdls have been a rapidly expanding subject area due to a number of factors

including the advancing complexity of digital electronics the increasing prevalence of generic and programmable components of software hardware and the migration of vlsi design to high level synthesis based on hdl's currently the subject has reached the consolidation phase in which languages and standards are being increasingly used at the same time as the scope is being broadened to additional application areas this book presents the latest developments in this area and provides a forum from which readers can learn from the past and look forward to what the future holds

Hardware Description Languages and their Applications

2013-06-05 there is great concern nowadays regarding the character and position of university studies all over europe as the result of a possible coordination of university studies within this context the subject of this book is the teaching and research activities of universities and other european institutions in the field of church state relations four university scholars basdevant gaudemet puza kotiranta and garcia pardo report along similar lines on the situation of university studies in this field in the different countries of the european union the first report also contains a historical description of the origins and development of the university studies of church state relations

Enseignement Du Droit Ecclésiastique de L'état Dans Les Universités Européenes 2005 the articles of this book are written by leading experts in partial differential equations and their applications who present overviews here of recent advances in this broad area of mathematics the formation of shocks in fluids modern numerical computation of turbulence the breaking of the einstein equations in a vacuum the dynamics of defects in crystals effects due to entropy in hyperbolic conservation laws the navier stokes and other limits of the boltzmann equation

occupancy times for brownian motion in a two dimensional wedge and new methods of analyzing and solving integrable systems are some of this volume s subjects the reader will find an exposition of important advances without a lot of technicalities and with an emphasis on the basic ideas of this field

Recent Advances in Nonlinear Partial Differential

Equations and Applications 2007 this book presents an extensive introduction to the field of kernel methods and real world applications the book is organized in four parts the first is an introductory chapter providing a framework of kernel methods the others address bioengineering signal processing and communications and image processing provided by publisher

Kernel Methods in Bioengineering, Signal and Image Processing 2007-01-01 1 2 a new momenttim

The Nature of the Obligations Under the International Covenant on Economic, Social and Cultural Rights 2003

the international symposium on distributed computing and artificial intel gence dcai 10 is an annual forum that brings together past experience current work and promising future trends associated with distributed computing artificial intelligence and their application to provide efficient solutions to real problems this symposium is organized by the biomedicine intelligent system and educational technology research group bisite usal es of the university of lamanca the present edition has been held at the polytechnic university of lencia from 7 to 10 september 2010 within the congreso español de informática cedi 2010 technology transfer in this field is still a challenge with a large gap between academic research and industrial products this edition of dcai aims at contributing to reduce this gap with a stimulating and productive forum where these communities can work towards future cooperation

with social and economic benefits this conference is the forum in which to present application of innovative techniques to complex problems artificial intelligence is changing our society its application in distributed environments such as internet electronic commerce environment monitoring mobile communications wireless devices distributed computing to cite some is continuously increasing becoming an element of high added value with social and economic potential both industry life quality and research these technologies are changing constantly as a result of the large research and technical effort being undertaken in universities companies

Distributed Computing and Artificial Intelligence

2010-11-18 take part in the future of wireless wireline convergence the ip multimedia subsystem ims established as the foundation for future wireless and wireline convergence is the bedrock that will facilitate easy deployment on new rich personalized multimedia communication services that mix telecom and data services designers planners and researchers of communication systems will need to make full use of the technology occurring with this convergence if they want to be the ones providing end users with new and efficient services that are as cost effective as they are innovative to provide researchers and technicians with the tools they need to optimize their role in this communication revolution the ip multimedia subsystem ims handbook presents all the technical aspects of the ims needed to support the growth of digital traffic and the implementation of underlying networks this guide covers everything from basic concepts to research grade material including the future direction of the architecture organized in three sections the book brings together the technical savvy of 50 pioneering experts from around the world providing complete

coverage of relevant concepts technologies and services learn how ims will speed innovation filling the gap between existing traditional telecommunications and internet technologies ims has led to an environment in which new services and concepts are introduced more quickly than ever before such as reusable service components and real time integration the technology promises to be a cost effective evolutionary path to future wireless and wireline convergences that will meet next generation service requirements

Party competition over the centre-periphery cleavage

in Spain 2023-10-18 this book is a comprehensive and in depth reference to the most recent developments in the field covering theoretical developments techniques technologies among others provided by publisher

IP Multimedia Subsystem (IMS) Handbook 2018-10-03 this

book is a comprehensive one stop guide for students intending to embark on study or work in spain for the first time it provides background information on contemporary spain practical advice on the student experience covering accommodation registration and adapting to spanish patterns of study as well as information on joining the spanish workforce it also includes an extensive directory of spain s 67 universities and their locations

Encyclopedia of Artificial Intelligence 2009-01-01 el

decreto de creación de la comisión nacional del bicentenario de carlos iii invitaba a valorar de forma debida y desde la perspectiva actual el reinado de nuestro ilustrado monarca eso es lo que pretende este libro para lo cual los autores han empezado por desprenderse del cúmulo de tópicos mistificaciones y propaganda que envuelve al despotismo ilustrado para estudiar su actuación real el alcance de unas supuestas reformas y los contenidos de la cultura de las luces nunca hubo en ningún

país europeo escribe j fontana en su introducción un déspota que se preocupase seriamente de la ilustración los que pretendieron jugar a reyes filósofos en sus ocios intelectuales cuidaron de impedir que tal juego influyese en su labor política cotidiana desde la perspectiva del escepticismo ante el mito y el rigor científico se estudia a carlos iii y la ilustración a partir de la capital del reino ese madrid del que se tiene al monarca sin que se sepa bien con qué mérito por el mejor alcalde el equipo madrid integrado por una veintena de investigadores jóvenes viene trabajando desde hace unos años en la universidad autónoma para un conocimiento más riguroso del madrid del antiguo régimen con la convicción de que es posible superar localismos y hacer una historia urbana crítica y fecunda este libro es fruto de ese empeño

Studying and Working in Spain 2001 the international symposium on distributed computing and artificial intelligence is an annual forum that brings together ideas projects lessons etc associated with distributed computing artificial intelligence and its applications in different themes this meeting has been held at the university of salamanca from the 22th to the 24th of october 2008 this symposium has been organized by the biomedicine intelligent system and educational technology research group bisite usal es of the university of salamanca the technology transfer in this field is still a challenge and for that reason this type of contributions has been specially considered in this edition this conference is the forum in which to present application of innovative techniques to complex problems the artificial intelligence is changing our society its application in distributed environments such as the internet electronic commerce mobile communications wireless devices distributed computing and so on is increasing and is becoming an element of high added value and economic

potential both industrial and research these technologies are changing constantly as a result of the large research and technical effort being undertaken in both universities and businesses the exchange of ideas between scientists and technicians from both academic and business areas is essential to facilitate the development of systems that meet the demands of today s society

Carlos III, Madrid y la Ilustración 1988 over the past decades an increasingly influential political philosophy approach has been seen to defend issues relating to cultural injustices the daily struggles arising from political agendas within different societies confirm this this perspective can be summarised using the hegelian expression struggle for recognition and it is this expression that underpins the current position of minorities members and their defenders this means that misrecognition disrespect and humiliation form the base of cultural injustices and must be avoided minorities are a fundamental part of democratic societies but their rights have not always been respected immigrants are currently the object of xenophobic campaigns some people the european minority face additional difficulties which results in them being key players in cases of indirect discrimination the distribution of territorial power and the situation of national minorities have been causes of different political problems who am i where do i belong are questions asking for identity some people argue these should be relevant issues when applying the criminal law circle of moral incumbency to cover animals non humans arguing that they of life that involves their survival as a whole those groups are faced with members and their defenders this publication is part of the new challenges of law project action agreement uc3m cam excellence of the university teaching staff v regional plan for scientific research and

technological innovation

Getafe ; Universidad Carlos III de Madrid 1990-01-01 a

realistic and comprehensive review of joint approaches to machine learning and signal processing algorithms with application to communications multimedia and biomedical engineering systems digital signal processing with kernel methods reviews the milestones in the mixing of classical digital signal processing models and advanced kernel machines statistical learning tools it explains the fundamental concepts from both fields of machine learning and signal processing so that readers can quickly get up to speed in order to begin developing the concepts and application software in their own research digital signal processing with kernel methods provides a comprehensive overview of kernel methods in signal processing without restriction to any application field it also offers example applications and detailed benchmarking experiments with real and synthetic datasets throughout readers can find further worked examples with matlab source code on a website developed by the authors github com dspkm presents the necessary basic ideas from both digital signal processing and machine learning concepts reviews the state of the art in svm algorithms for classification and detection problems in the context of signal processing surveys advances in kernel signal processing beyond svm algorithms to present other highly relevant kernel methods for digital signal processing an excellent book for signal processing researchers and practitioners digital signal processing with kernel methods will also appeal to those involved in machine learning and pattern recognition

International Symposium on Distributed Computing and Artificial Intelligence 2008 (DCAI'08) 2008-09-16

interactive systems are growing in the last decade because of the amount of fields in which this kind of application can

be used as a test bed to experiment in medicine training education and so on developing future interactive systems is a compilation of knowledge collected from several researchers in the field of interactive systems offering an overview of the different parts of the environment that must be taken into account to develop a quality interactive system from the software engineering discipline the book is oriented to developers of interactive systems as well as researchers in the field of virtual environments

Struggles for recognition 2018-02-05 intelligent

environments ies aims to empower users by enriching their experience raising their awareness and enhancing their management of their surroundings the term ie is used to describe the physical spaces where ict and pervasive technologies are used to achieve specific objectives for the user and or the environment the growing ie community from academia and practitioners is working on the materialization of ies driven by the latest technological developments and innovative ideas this book presents the proceedings of the workshops held in conjunction with the 16th international conference on intelligent environments ie2020 madrid spain 20 23 july 2020 the conference focused on the development of advance intelligent environments as well as newly emerging and rapidly evolving topics the workshops included here emphasize multi disciplinary and transverse aspects of ie as well as cutting edge topics 10th international workshop on intelligent environments supporting healthcare and well being wishwell 20 9th international workshop on the reliability of intelligent environments worie2020 4th international workshop on legal issues in intelligent environments liie 20 4th international workshop on intelligent systems for agriculture production and environment protection isapep 20 4th international

workshop on citizen centric smart cities services ccscs 20
2nd international workshop on intelligent environments
and buildings ieb 20 1st international workshop on
research on smart grids and related applications sgra 20
1st international workshop on open and crowdsourced
location data isoclod 20 1st international workshop on
social media analysis for intelligent environment smaie 20
the proceedings contain contributions reflecting the latest
research developments in ies and related areas focusing on
stretching the borders of the current state of the art and
contributing to an ever increasing establishment of ies in
the real world it will be of interest to all those whose work
involves the design or application of intelligent
environments

Digital Signal Processing with Kernel Methods

2004-11-30 following on from a three year knowledge
management project seven organisations formed aco
operative group for knowledge management this group
meets through the knowledge management implementers
forum kmif each of the organisations participating in this
work are by implication interested in the development of
km the aims of the forum are t9 exchange ideas and share
experience in the areaofknowledge management the
organisations involved are british aerospace samlesbury ici
icl north westwater ids cad graphics liverpool john moores
university nwaiaig blackburn college 1 1 the organisations
involved each ofthe organisations has specific reasons for
being involved in this project and in km the british
aerospace samlesbury site is a large manufacturing site
employing ground breaking technology for europe s front
line military aircraft the factory works with a well managed
supply chain and works closely with other british
aerospace sites in the manufacture of aircraft components
it has set up a partnership with another aerospace

company based on exchange of knowledge and therefore needs to value that knowledge. ICI is one of the UK's leading chemical companies and plays on an international stage. Changes in international supply and demand require ICI to respond quickly to market pressures. This means that the company needs to use its knowledge assets in a well-managed way and put systems in place that increase the flexibility and ensure the security of these important assets.

Developing Future Interactive Systems 2020-08-21 This book contains the proceedings of the second international symposium on the education in mechanism and machine science (SEMMS 2017) which was held in Madrid, Spain. The symposium has established a stable framework for exchanging experience among researchers regarding mechanism and machine science with special emphasis on new learning technologies and globalization. The papers cover topics such as mechanism and machine science in mechanical engineering curricula, mechanism and machine science in engineering programs, methodology, mechanism and machine science in engineering programs, applications and research, and new trends in mechanical engineering education.

Intelligent Environments 2020 2012-12-06 In the shadow of Vitoria, a history of international law in Spain, 1770-1953 offers the first comprehensive treatment of the intellectual evolution of international law in Spain from the late 18th century to the aftermath of the Spanish Civil War.

Applications and Innovations in Intelligent Systems VII 2018-09-20 Nowadays it is quite easy to see various applications of fibrous composites: functionally graded materials, laminated composite nano-structured reinforcement, morphing composites in many engineering fields such as aerospace, mechanical, naval, and civil engineering. The increase in the use of composite structures

in different engineering practices justify the present international meeting where researchers from every part of the globe can share and discuss the recent advancements regarding the use of standard structural components within advanced applications such as buckling vibrations repair reinforcements concrete composite laminated materials and more recent metamaterials for this reason the establishment of this 19th edition of international conference on composite structures has appeared appropriate to continue what has been begun during the previous editions iccs wants to be an occasion for many researchers from each part of the globe to meet and discuss about the recent advancements regarding the use of composite structures sandwich panels nanotechnology bio composites delamination and fracture experimental methods manufacturing and other countless topics that have filled many sessions during this conference as a proof of this event which has taken place in porto portugal selected plenary and keynote lectures have been collected in the present book

New Trends in Educational Activity in the Field of Mechanism and Machine Theory 2017-11-27 real world problems and modern optimization techniques to solve them here a team of international experts brings together core ideas for solving complex problems in optimization across a wide variety of real world settings including computer science engineering transportation telecommunications and bioinformatics part one covers methodologies for complex problem solving including genetic programming neural networks genetic algorithms hybrid evolutionary algorithms and more part two delves into applications including dna sequencing and reconstruction location of antennae in telecommunication networks metaheuristics fpgas problems arising in

telecommunication networks image processing time series prediction and more all chapters contain examples that illustrate the applications themselves as well as the actual performance of the algorithms optimization techniques for solving complex problems is a valuable resource for practitioners and researchers who work with optimization in real world settings

In the Shadow of Vitoria: A History of International Law in Spain (1770-1953) 2008 el presente volumen se propone enseñar al estudiante las reglas necesarias para redactar un proyecto de investigación y lo hace de manera clara didáctica y simple pero al mismo tiempo estricta y rigurosa su autora es una persona idónea para acompañar al estudiante por esta senda de aprendizaje y no solo porque ella también ha adquirido esta destreza y la ha puesto en práctica en numerosos casos sino porque su capacidad de reflexión sobre su propia habilidad junto con su competencia didáctica ha dado pie a este libro tan útil y necesario. Teresa Cabré este libro nos proporciona una guía para la redacción de proyectos de investigación que puede ser de gran ayuda tanto para la realización de trabajos finales de grado o máster como para estudiantes de doctorado que inician su trabajo de investigación se trata de una obra muy bien organizada que puede constituir un excelente material docente para las asignaturas relacionadas con los trabajos finales así como una obra de consulta de gran utilidad para investigadores de diferentes áreas de conocimiento. Antoni Oliver, director de la colección lingüística y traducción

Genetic and Evolutionary Computation for Image Processing and Analysis 2016-08-01 this book presents a vital compendium of research detailing the latest case studies architectures frameworks methodologies and research on digital democracy provided by publisher

ICCS19 19th International Conference on Composite Structures 2009-03-23 this book provides applications of nature inspired computing for economic theory and practice finance and stock market manufacturing systems marketing e commerce e auctions multi agent systems and bottom up simulations for social sciences and operations management provided by publisher

Optimization Techniques for Solving Complex Problems

2016-11-28 bridging the gap between research and practice communities is more pertinent than ever because of the need for evidence in developing and evaluating library services and programs the gap between research and library practice has been discussed in the library and information science lis field for almost two decades the issues range from limited transfer of ideas from research into practice to a lack of education in research methods for library practitioners this book introduces new voices from international research and practice communities into the discussion and contributes to the debate about the research practice divide education and continuing training in research methods from international perspectives are explored and the experiences of researcher practitioners from several countries highlight the issues the volume includes chapters from lis educators academic researchers and researcher practitioners from 18 countries it features the voices of instructors who teach research methods in lis programs and library practitioners who engage in research the book is addressed to the global audience of lis educators and practitioners with the goal of deepening the understanding of lis education and training in research methods through sharing case studies and approaches to teaching and conducting research in practice

El trabajo de fin de grado y de máster 2012-06-30 it is a truism that almost all the major principles established by

the ecj have been decided in the context of a reference to that court for a preliminary ruling under article 234 ex 177 ec article 234 facilitates a dialogue between the national courts and the ecj in order to allow national courts to seek guidance on the appropriate interpretation of community law principles in a particular legal dispute from a community perspective this process should enhance the uniform and consistent interpretation of community law throughout the national courts this book adds to a growing body of literature on the ecj s role in developing community law and comprises quantitative and qualitative aspects it is based on collaborative research involving 14 member states which focused on the article 234 procedure in relation to competition law and state aid cases rapporteurs were appointed in each member state from which any article 177 234 references had been made in relation to competition law or state aid the results presented here follow up competition law related article 234 rulings to their domestic legal context to ascertain what happened in the subsequent legal phase when parties seek to enforce their rights or rely on other party s obligations on the basis of the ruling by the ecj each national report is built on a questionnaire seeking information on a range of issues relative to every competition law related ruling by the ecj in references from that member state s courts including the following the number of rulings in relation to that member state the dates of all rulings details of the case background reference questions and the ecj ruling for each case and information where available on each post ruling process the research is comprehensive in reviewing all competition law related rulings to 1 may 2004 and pioneering as being the first systematic attempt to collate detailed information on all relevant cases including crucially the post ruling

process this research is an important contribution to the literature on the ecj and its role in developing a competition culture across the community moreover the importance of ensuring consistency and uniformity in the implementation of ec competition law by national courts has been given added significance following the accession of new member states in light of these factors this book will serve as a reliable groundwork for further studies of the development of european integration particularly as it focuses on competition law an area of ever increasing significance and importance it is also of distinctive value to practitioners seeking precedents or juridical context on which to build arguments in european competition law

Digital Democracy: Concepts, Methodologies, Tools, and Applications 2006-09-30 new trends in smart

nanosstructured biomaterials in health sciences provides guidance on the design and synthesis of nanosstructured smart biomaterials as well as the resultant therapeutic effects and associated biomedical applications of these novel materials the book provides readers with a deeper understanding of these novel biomaterials and aids them in making informed decisions when selecting appropriate materials for tissue engineering and cancer therapy applications it will be of specific interest to materials scientists biomedical engineers oncological scientists tissue engineers and those working in regenerative medicine nanosstructured smart materials have the special ability to respond to changes in the cell microenvironment allowing for robust biocompatible and rapidly adaptable therapeutic and restorative action against a range of ailments these materials are thus ideal candidates for use in tissue engineering and cancer therapy due to the varying nature of the cell microenvironment between persons tissues and cancers this book covers the design

synthesis unique properties and application of smart biomaterials in these two key topic areas of tissue engineering and cancer therapeutics presents an overview of how smart biomaterials respond to changes in physiological factors and exogeneous stimuli and their impact in modern medicine provides readers with the basis for designing processing and characterizing advanced smart biomaterials guides the reader through the mechanisms of tissue repair and cancer therapeutics by exploring the most relevant features of smart nanostructured materials

Handbook of Research on Nature-Inspired Computing for Economics and Management 2023-11-20 this book

presents innovative and high quality research on the implementation of conceptual frameworks strategies techniques methodologies informatics platforms and models for developing advanced knowledge based systems and their application in different fields including agriculture education automotive electrical industry business services food manufacturing energy services medicine and others knowledge based technologies employ artificial intelligence methods to heuristically address problems that cannot be solved by means of formal techniques these technologies draw on standard and novel approaches from various disciplines within computer science including knowledge engineering natural language processing decision support systems artificial intelligence databases software engineering etc as a combination of different fields of artificial intelligence the area of knowledge based systems applies knowledge representation case based reasoning neural networks semantic and tics used in different domains the book offers a valuable resource for phd students master s and undergraduate students of information technology it

related degrees such as computer science information systems and electronic engineering

Bridging Research and Library Practice 2008-03-13

education and training for the library profession have changed over the decades and this publication looks both at the past and the future of these developments at schools of library and information science as well as the role of ifla s section on education and training the chapters cover regional developments in europe asia africa australia and the americas special topics such as quality assurance and case studies and future considerations in lis education

Article 234 and Competition Law 2022-10-07 this book

presents novel communication technology solutions to address the effects of climate change and climate variability on agriculture with a particular focus on those that increase agricultural production it discusses decision support and early warning systems for agriculture information technology it supporting sustainable water management and land cover dynamics predictive of crop production models and software applications for reducing the effects of diseases and pests on crops further topics include the real time monitoring of weather conditions and water quality as well as food security issues featuring the proceedings of the international conference of ict for adapting agriculture to climate change aacc 18 held on november 21 23 2018 in cali colombia the book represents a timely report and a source of new ideas and solutions for both researchers and practitioners active in the agricultural sector around the globe

New Trends in Smart Nanostructured Biomaterials in Health Sciences 2017-03-13 this volume aims to present

an updated portrait of the roman countryside in roman spain by the comparison of different theoretical orientations and methodological strategies including the

discussion of textual and iconographic sources and the analysis of the faunal remains the archaeology of rural areas of the roman world has traditionally been focused on the study of villae both as an architectural model of roman otium and as the central core of an economic system based on the extensive agricultural exploitation of latifundia the assimilation of most rural settlements in provincial areas of the roman empire with the villa model implies the acceptance of specific ideas such as the generalization of the slave mode of production the rupture of the productive capacity of late iron age communities or the reduction in importance of free peasant labor in the roman economy of most rural areas however in recent decades as a consequence of the generalized extension of preventive or emergency archaeology and survey projects in most areas of the ancient territories of the roman empire this traditional conception of the roman countryside articulated around monumental villae is undergoing a thorough revision new research projects are changing our current perception of the countryside of most parts of the roman provincial world by assessing the importance of different types of rural settlements in the last years we have witnessed the publication of archaeological reports on the excavation of thousands of small rural sites farms farmsteads enclosures rural agglomerations of diverse nature etc one of the main consequences of all this research activity is a vigorous discussion of the paradigm of the slave mode of production as the basis of roman rural economies in many provincial areas a similar change in the paradigm is taking place with some delay in the archaeology of roman spain after decades of preventive emergency interventions there is a considerable quantity of unpublished data on this kind of rural settlements however unlike the cases of roman britain or gallia comata no

synthesis or national projects are undertaking the task of systematizing all these data with the intention of addressing this current situation the present volume discusses the results and methodological strategies of different projects studying peasant settlements in several regions of roman spain

Current Trends on Knowledge-Based Systems

2016-07-11 this book contains a selection of papers accepted for presentation and discussion at robot 2022 fifth iberian robotics conference held in zaragoza spain on november 23 25 2022 robot 2022 is part of a series of conferences that are a joint organization of seidrob sociedad española para la investigación y desarrollo en robótica spanish society for research and development in robotics and spr sociedade portuguesa de robótica portuguese society for robotic robot 2022 builds upon several previous successful events including three biennial workshops and the four previous editions of the iberian robotics conference and is focused on presenting the research and development of new applications on the field of robotics in the iberian peninsula although open to research and delegates from other countries robot 2022 featured four plenary talks on state of the art subjects on robotics and 15 special sessions plus a main general robotics track in total after a careful review process 98 high quality papers were selected for publication with a total of 219 unique authors from 22 countries

Educating the Profession 2018-11-20 nowadays we are facing numerous and important imaging problems nondestructive testing of materials monitoring of industrial processes enhancement of oil production by efficient reservoir characterization emerging developments in noninvasive imaging techniques for medical purposes computerized tomography ct magnetic resonance imaging

mri positron emission tomography pet x ray and ultrasound tomography etc in the cime summer school on imaging martina franca italy 2002 leading experts in mathematical techniques and applications presented broad and useful introductions for non experts and practitioners alike to many aspects of this exciting field the volume contains part of the above lectures completed and updated by additional contributions on other related topics
