Composer's Desk Reference for the Classic Guitar

2010-10-07

traditionally the classic guitar has been either excluded or inadequately represented in orchestration textbooks resulting in much misinformation about its technique its practicality in various performance contexts and its character the guitar s unique tuning broad timbral variety and intimate nature pose a formidable challenge to non guitarist composers for whom an extensive amount of time would be required to gain even a minimal hands on acquaintance for most composers this is an unrealistic expectation leading to time consuming consultations and extensive drafting or rewriting the purpose of this book is to provide the non guitarist composer with the fundamental tools needed to write idiomatically for the guitar the first of its kind for the guitar the reference was written in consultation with dozens of composers and conceived with three types of end users in mind

Meet the Great Composers, Bk 2

1997-09

in recent years gian francesco malipiero has been recognised increasingly widely as one of the most original and strangely fascinating italian composers of the early 20th century he was the teacher of maderna and nono and was revered by among many others dallapiccola who even called him the most important musical personality that italy has had since the death of verdi he was also a key figure in the revival of the long neglected music of italy s great past and himself edited what remains the only virtually

complete edition of the surviving compositions of monteverdi the present book not only provides the first monographic survey of malipiero s life times and music to appear in english but covers the subject more comprehensively than any previous publication in any language dr waterhouse draws on hitherto unpublished documents and with the help of numerous musical examples analyses the composer s works style and idiosyncratic personality
